

2026-2027 INTERN CLASS ORIENTATION HANDBOOK

Updated June 2026

1201 E. 36th Avenue, Anchorage, Alaska 99508

P 907.561.4500

F 907.561.4806

June 29, 2026

Dear 2026-2027 Interns,

Welcome to the Alaska Psychology Internship Consortium (AK-PIC)! We're truly grateful to have you with us on the traditional land of the Dena'ina people as you embark on your doctoral internship.

AK-PIC represents the hard work and commitment of many individuals passionate about delivering high-quality psychology training in Alaska. As the first program of its kind, we're proud to be seen as a model for internship development across the country. Your contributions as an intern here are vital; the work you do will help pave the way for the next generation of psychologists in Alaska and beyond.

The AK-PIC faculty is excited to support your growth this year and to help make AK-PIC the outstanding internship program it was designed to be. Please reach out to us and to each other as we navigate this internship year together.

Sincerely,

Rebecca Volino Robinson

WICHE OVERVIEW

The Western Interstate Commission for Higher Education (WICHE) is a regional government organization of the fifteen Western-most states and Pacific Jurisdictions, created by congressional compact to improve access to educational opportunities by facilitating-resource sharing among higher education systems. The WICHE Behavioral Health Program (WICHE-BHP) was established to support the improvement of public behavioral health services and the preparation and continuing education of the behavioral health workforce in the West. The WICHE-BHP is a recognized national leader in rural behavioral health initiatives and is actively engaged in workforce development activities across the WICHE States and workforce development, the WICHE-BHP has specific expertise in the development and operations of doctoral psychology internships and currently operates a national internship development initiative known as the WICHE Psychology Internship Cooperative (WICHE-PIC).

WICHE has been involved with the Alaska Psychology Internship Consortium since its inception, and was the organizing force behind developing the program and providing ongoing consultation and technical assistance to ensure its accreditation by the American Psychological Association. WICHE continues to provide support to the AK-PIC program since its obtainment of accreditation, by serving as an administrative and fiscal agent to the program. Every supportive service provided by WICHE is intended to decrease the overall administrative burden on AK-PIC in order to maximize the amount of time the faculty can direct toward providing high-quality training to its interns.

WICHE functions as a support to AK-PIC interns as well as the training faculty. Because WICHE manages much of the funding for the consortium, interns will receive all program-approved reimbursements from WICHE. All requests for reimbursement should be submitted to Janell Daly and should adhere to all documented AK-PIC and WICHE policies. WICHE also administers AK-PIC's website and interns may contact WICHE with questions or problems related to the website. These inquiries may be directed to Karly Dickinson, AK-PIC's Technical Assistance Associate.

Interns should be aware that, while their training supervisors should always be considered the first point of contact for any question or problem related to the internship, the assistance of WICHE is a resource that your internship program makes available in order to support the success of the interns as well as the training program. Thus, if there is any way that you feel that WICHE can support your development as a professional in the field of psychology, please feel free to reach out to us.

Karly Dickinson

2026-2027

Alaska Psychology Internship Consortium

BROCHURE

Updated September 2025

Aim:

Alaska Psychology Internship Consortium (AK-PIC)'s aim is to prepare and retain psychologists to provide culturally competent collaborative health care for Alaska's unique and diverse people.

The Alaska Psychology Internship Consortium (AK-PIC) is a collaborative initiative among three Alaska agencies aimed at providing a diverse educational experience for doctoral psychology interns. Designed to equip interns with the skills to address the unique challenges of practicing in rural and remote areas, AK-PIC focuses on fostering clinical competency in working with Alaska's diverse cultural communities.

Accreditation Status

Alaska Psychology Internship Consortium (AK-PIC) is accredited by the APA. AK-PIC received re-accreditation in June 2019 and is effective for 10 years. Questions about AK-PIC's training may be directed the Training Director, Dr. Rebecca Volino Robinson: Rebecca.Robinson2@providence.org. Questions specifically related to the program's accredited status should be directed to the Commission on Accreditation:

[Office of Program Consultation and Accreditation](#)

American Psychological Association

750 1st Street, NE, Washington, DC 20002

Phone: (202) 336-5979

Email: apaaccred@apa.org

APPIC Membership Status

AK-PIC is a participating member of APPIC and participates in the APPIC match.

Internship Admissions, Support, & Initial Placement Data

See Appendix.

Program Structure

The Consortium offers one-year, full-time internship placements that begin and end around July of each year. The Consortium is comprised of organizations in Alaska and will provide a range of clinical and didactic experiences that represent the necessary depth and breadth required for future professional practice with Alaska's diverse communities. Interns will have a primary placement at one site and will participate in cross-site training weekly. Across training sites, interns will complete a minimum of 500 hours per internship year of face-to-face direct service delivery.

AK-PIC Competencies and Training Elements

AK-PIC offers one-year, full time internship positions in Alaska. Interns are expected to respond professionally in increasingly complex situations with a greater degree of independence across levels of training. It is expected that by the conclusion of the internship year, interns will have accomplished the following competencies and learning elements:

1. Profession-wide Competency: Research

Training elements associated with this competency include:

- Demonstrate the substantially independent ability to critically evaluate and disseminate research or other scholarly activities (e.g., case conference, presentation, publications) at the local (including the host institution), regional, or national level.
- Demonstrate knowledge of and respect for scientific bases of behavior.

|| **Profession-wide Competency: Ethical and Legal Standards**

Training elements associated with this competency include:

- Be knowledgeable of, demonstrate and act in accordance with each of the following:
 - The current version of the APA Ethical Principles of Psychologists and Code of Conduct;
 - Relevant laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional, and federal levels; and
 - Relevant professional standards and guidelines.
- Recognize ethical dilemmas as they arise and apply ethical decision-making processes in order to resolve the dilemmas.
- Conduct self in an ethical manner in all professional activities.
- Consult actively with supervisor to act upon ethical and legal aspects of practice.

|| **Profession-wide Competency: Individual and Cultural Diversity**

Training elements associated with this competency include:

- Demonstrate an understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves
- Demonstrate knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service.
- Demonstrate the ability to integrate awareness and knowledge of individual and cultural differences in the conduct of professional roles (e.g., research, services, and other professional activities). This includes the ability to apply a framework for working effectively with areas of individual and cultural diversity not previously encountered over the course of their careers. Also included is the ability to work effectively with individuals whose group membership, demographic characteristics, or worldviews create conflict with their own.
- Demonstrate the ability to independently apply their knowledge and approach in working effectively with the range of diverse individuals and groups encountered during internship.
- Initiate supervision regularly about diversity issues and integrate feedback into practice.

II. Profession-wide Competency: Professional Values, Attitudes, and Behaviors

Training elements associated with this competency include:

- Behave in ways that reflect the values and attitudes of psychology, including cultural humility, integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others.
- Engage in self-reflection regarding one's personal and professional functioning; engage in activities to maintain and improve performance, well-being, and professional effectiveness.
- Actively seek and demonstrate openness and responsiveness to feedback and supervision.
- Respond professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training.
- Accept responsibility for meeting deadlines, completing required documentation promptly and accurately.

III. Profession-wide Competency: Communication and Interpersonal Skills

Training elements associated with this competency include:

- Develop and maintain effective relationships with a wide range of individuals, including colleagues, communities, organizations, supervisors, supervisees, and those receiving professional services.
- Demonstrate a thorough grasp of professional language and concepts; produce, comprehend, and engage in communications that are informative and well-integrated.
- Demonstrate effective interpersonal skills and the ability to manage difficult communication well.
- Demonstrate knowledge of and comfort with the technological systems necessary to provide distance delivery.
- Engage in social media activities in a manner that maintains professionalism and respect.

IV. Profession-wide Competency: Assessment

Training elements associated with this competency include demonstration of the following:

- Demonstrate current knowledge of diagnostic classification systems, functional and dysfunctional behaviors, including consideration of client strengths and psychopathology.
- Demonstrate understanding of human behavior within its context (e.g., family, social, societal and cultural).

- Demonstrate the ability to apply the knowledge of functional and dysfunctional behaviors including context to the assessment and/or diagnostic process.
- Select and apply assessment methods that draw from the empirical literature and that reflect the science of measurement and psychometrics; collect relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment as well as relevant diversity characteristics of the service recipient.
- Interpret assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision-making biases, distinguishing the aspects of assessment that are subjective from those that are objective.
- Communicate findings and implications of the assessment in an accurate and effective manner sensitive to a range of audiences.
- Articulate relevant developmental features, clinical symptoms, and cultural factors as applied to presenting questions and findings (e.g., intergenerational trauma).

Profession-wide Competency: Intervention

Training elements associated with this competency include:

- Establish and maintain effective relationships with the recipients of psychological services.
- Develop evidence-based intervention plans specific to the service delivery goals.
- Implement interventions informed by the current scientific literature, assessment findings, diversity characteristics, and contextual variables.
- Demonstrate the ability to apply the relevant research literature to clinical decision making.
- Modify and adapt evidence-based approaches effectively when a clear evidence-base is lacking.
- Evaluate intervention effectiveness and adapt intervention goals and methods consistent with ongoing evaluation.
- Demonstrate ability to conduct a multi-diagnostic differential assessment and apply specific evidence-based interventions (e.g., intergenerational trauma) for Substance Use/Co-occurring Disorders.

Profession-wide Competency: Supervision

Training elements associated with this competency include:

- Apply supervision knowledge in direct or simulated practice with psychology trainees, or other health professionals. Examples of direct or simulated practice examples of supervision include, but are not limited to, role-played supervision with others, and peer supervision with other trainees.

- Apply the supervisory skills of observing, evaluating and giving guidance and feedback in direct or simulated practice.
- Demonstrate understanding of roles and responsibilities of the supervisor and supervisee in the supervision process.
 - o Collaborate with supervisor and provide feedback regarding supervisory process.
 - o Seek supervision to improve performance, presenting work for feedback, and integrating feedback into performance.
- Provide feedback to peers regarding peers' clinical work in context of group supervision or case conference.

§ Profession-wide Competency: **Consultation and Interprofessional/Interdisciplinary Skills**

Training elements associated with this competency include:

- Demonstrate knowledge and respect for the roles and perspectives of other professions.
- Apply knowledge of consultation models and practices in direct or simulated consultation with individuals and their families, other health care professionals, interprofessional groups, or systems related to health and behavior.
- Direct or simulated practice examples of consultation and interprofessional/interdisciplinary skills include but are not limited to:
 - o Role-played consultation with others, peer consultation, provision of consultation to other trainees.
 - o Consultation within a direct care team or setting.

Supervision

One licensed psychologist will serve as primary clinical supervisor for each intern. Interns receive a minimum of two (2) hours of individual supervision each week from a licensed psychologist. Supplemental weekly individual supervision may be provided by other appropriately credentialed professionals at the training site. When and if needed, individual supervision will/can be conducted via telesupervision for interns. One hour of weekly group supervision will be required and conducted with all interns across consortium sites. Group supervision may focus on legal/ethical issues and clinical topics. All interns will receive a total minimum of 4 hours per week of supervision.

Stipend, Benefits, and Resources

The annual stipend at the Providence Family Medicine Center (PFMC) and Aleutian Pribilof Islands Association (APIA) will be \$35,000. The annual stipend at the Alaska Psychiatric Institute (API) will be \$40,000. This difference in compensation is intended to help offset differences in employee benefit costs at API.

All interns are required by the consortium to have current health insurance coverage. Access to health benefits will be provided to all interns but may vary across sites. Annual vacation, professional, and sick leave will be available to all interns. All interns are responsible for ensuring they secure medical coverage by the beginning of the internship year (note some insurance companies have more lengthy review and approval processes prior to approving coverage). All interns are required to submit proof of health insurance coverage at the beginning of internship and upon request.

With regard to Family and Medical Leave extensions during the internship year, agency parameters will dictate extended leave options. Interns are responsible for discussing leave requests with their supervisor and working in coordination with the HR department. Not all sites have the ability to provide extensions.

AK-PIC interns have access to numerous resources. Funding for travel within the state of Alaska is provided in order for interns to complete required training experiences. Assessment and other training materials are provided by each training site, and additional materials that may be needed can be purchased using consortium funding with Training Committee approval. Additionally, each intern has access to administrative and IT support through their primary training site.

Application Process and Selection Criteria

The Consortium will offer full-time positions during the 2026-2027 internship year. Students interested in applying for the internship program should submit an online application through the APPIC website (www.appic.org). Applicants may apply to as many or as few training sites within AK-PIC as they choose. Applicants designate the training sites by selecting the appropriate Match Number when submitting the application. Only one complete application is required for consideration to any of the sites in the Consortium.

In addition, due to HRSA funding, AK-PIC is only granting interviews to applicants who are a US citizen, non-citizen national of the US, or a foreign national who possesses a visa permitting permanent residence in the US.

A complete application package consists of the following materials:

1. A completed On-line AAPI (APPIC's standard application)
2. Cover letter (part of on-line AAPI) stating your preferred training site(s) and why you are interested in those sites specifically
3. A current Curriculum Vitae (as part of the on-line AAPI)
4. Three letters of recommendation, two of which must be from people who have directly supervised your clinical work (as part of the on-line AAPI). **Please submit no more than three letters**
5. Official transcripts of **all** graduate coursework

For all deadlines, please see the table below. All application materials must be received by the deadline to be considered. If applicants are invited to an interview, they will be notified by email on or before the interview notification date. At that time, they will also be informed of the sites for which they have been selected to interview.

For those 2026-2027 applicants who are selected to interview with one or more of our sites, the interviews will be conducted through video-conferencing technology.

AK-PIC Important Dates for 2026-2027 Applicants	
Application Deadline	November 3, 2025
Interview Notification	December 8, 2025
Interview Dates	January 13, 14, 15, 2026
Internship Slots Open Across Sites for 2026-2027	Alaska Psychiatric Institute – 2 Aleutian Pribilof Islands Association – 2 Providence Family Medicine Center/Alaska Family Medicine Residency – 2

AK-PIC will base its selection process on the entire application package noted above. Applicants must be currently enrolled and in good standing in an APA-accredited doctoral program. Strong preference is given to applicants who have also met the following qualifications prior to beginning internship:

1. A minimum of 500 intervention hours.
2. A minimum of 50 assessment hours.
3. A minimum of 5 integrated assessment reports.
4. Dissertation proposal defense scheduled for completion before internship begins.
5. Experience or special interest in working with diverse populations.

In addition to the preferences noted above, AK-PIC takes into consideration the potential commitment or interest of any prospective intern to remain in Alaska following an internship. Developing a strong behavioral health workforce is an important consideration for the state, and an interest in remaining in Alaska to join the workforce will be considered a benefit in a potential intern.

AK-PIC Training Sites

The consortium includes the following sites: Alaska Psychiatric Institute, Aleutian Pribilof Islands Association, and Providence Family Medicine Center/Alaska Family Medicine Residency. Each site is described below.

Alaska Psychiatric Institute (API)

General Information

Alaska Psychiatric Institute (API) is the only public psychiatric hospital in the State of Alaska. API provides acute, inpatient mental health services for anyone in Alaska requiring hospitalization for a psychiatric crisis. The vast majority of patients served at this hospital are experiencing severe and persistent mental illnesses. Most patients also have complex trauma histories in conjunction with substance use issues, requiring the treating professionals to maintain a high level of familiarity with evidence-based practices for multiple presenting problems. In addition, API serves as the safety net and crisis-stabilization facility for adults with developmental disabilities as well as seniors with dementia whose behavior and/or level of illness prevents them from remaining in their current placement. These patients often require intensive evaluation and innovative behavioral interventions to stabilize them and return them to a less restrictive environment in the community. The 80-bed state hospital is located in Anchorage and has two adult clinical units, one adult unit cohorting individuals with neurodevelopmental and neurocognitive disorders, one adolescent unit, and one adult forensic unit. API is a teaching hospital and is adjacent to the University of Alaska Anchorage. Graduate students in other professional medical programs also complete clinical rotations and practica at the hospital. Most individuals at API are admitted on a court order (for danger to self, danger to others, and/or grave disability) and must be assessed to determine if they continue to meet criteria for involuntary admission or the involuntary administration of medication. Legal hearings on these issues are held at the hospital several times per week.

Additionally, API is currently the only location in the state that provides competency restoration treatment for individuals who have been found by the Court to be Incompetent to Stand Trial.

Experience at API will provide interns ample opportunity to expand cultural competency as Anchorage has a culturally and linguistically diverse population (the local school district serves families from more than 90 distinct language groups). Persons served within the hospital in 2019 self-reported approximately 41% as Caucasian and 38% as Alaska Native, 8% as African American, 13% as 'other'. In 2019, API primarily treated adults ages 18 and older with 40% self-reporting as female, 60% as male. Only eight (8) adolescents ages 13-17 years were treated in 2019, prior to the treatment unit closing. As of Spring 2021, the adolescent unit reopened, and is currently at full capacity, with 10-adolescents admitted to the unit.

The Internship Experience

Interns work as full-time stipend employees at API and are expected to work Monday through Friday during regular business hours (with some flexibility). During their time at API, interns are active members of multidisciplinary treatment teams and develop skill in collaborating with professionals in psychiatry, medicine, social work, occupational therapy, recreational therapy, music therapy, and nursing. API is a diverse training site that allows for a number of learning opportunities for interns. Interns will work with their individual supervisors to discuss personal clinical areas of interest and training opportunities. Interns will facilitate therapeutic and psychoeducational groups on a variety of topics. Each intern is encouraged to develop one therapy group on a topic of special interest. Interns will also be given the opportunity to work across different units, and if the intern wants to provide a group on a specific civil or the forensic unit, this will be accommodated as available. Additionally, interns will be offered the opportunity to facilitate family therapy sessions, assist with the creation and implementation of behavior plans, and will work with patients in the milieu. Interns will also be asked to conduct psychological assessments and draft integrated reports. Tests regularly conducted at API include intelligence testing, neuropsychological screening, suicide risk assessment, violence risk assessment, malingering testing, personality assessment, and testing to assist with diagnostic clarification. Psychology interns may also serve as clinical supervisors to graduate-level practicum psychology students, to gain supervisory experience.

Additionally, depending on interest, there will be opportunities to work with forensic services at the hospital. API is in the process of starting both an outpatient and jail-based competency restoration program. Interns could have the opportunity to provide restoration in these programs, as well as on the inpatient unit. Furthermore, interns could be provided the opportunity to observe competency evaluations, interactions with other professionals involved in the legal process, competency hearings, and court testimony relating to competency evaluations and restoration. Depending on availability and interest, interns could also be provided the opportunity to complete a few competency evaluations independently under supervision.

Supervision and Training: Interns meet individually with their primary supervisors each week for supervision, which addresses all aspects of the intern's clinical work. Interns will also be able to meet with and consult with other members of psychology staff to discuss unit specific questions or cases. Additionally, group supervision for interns and psychology practicum students is held weekly. Interns will have the opportunity to share case conceptualizations, lead discussions regarding topics as they arise, trends in psychology, and cultural considerations for providing therapy to patients. Each intern is expected to develop one targeted staff training presentation over the year.

Special Requirements of Applicants

Prior to beginning internship, all API interns must pass a background check per Alaska Statute 47.05.300-47.05.390. This check is conducted by the Alaska Department of Health and Social Services Background Check Unit. The background check occurs after the Match outcome. The history of a felony or misdemeanor may result in a failure in this review process and prevent the intern from working at API. See State of Alaska Barrier Crime Matrix for a full listing of barrier

crimes: <https://www.akcertification.org/wp-content/uploads/documents/Barrier-Crime-Matrix.pdf>.

Providence Family Medicine Center (PFMC)/Alaska Family Medicine Residency (AKFMR)

General Information

Providence Family Medicine Center (PFMC) is a primary care clinic dedicated to providing a full spectrum of family medicine services, accessible to every member of our community.

Our services include:

- Preventive care
- Treatment for acute and chronic diseases
- Same-day urgent appointments
- Procedures and minor surgeries
- Behavioral health and social services
- Prenatal, pediatric, and geriatric care
- Medical intensive case management

As a fully integrated primary care clinic, PFMC employs a robust team-based care model. Our interdisciplinary team includes professionals specializing in Behavioral Health, Social Work, Nurse Case Management, Patient Navigation, Home Visits, and Pharmacy Services. This collaborative approach enables us to work closely with a patient's primary care physician, increasing access to care, reducing unnecessary hospitalizations, and ultimately improving patient outcomes.

PFMC serves as a critical "safety net" clinic for underserved and under-resourced populations in Anchorage, Alaska, primarily focusing on Medicare, Medicaid, and uninsured individuals. Among our patients, approximately 58% identify as Caucasian, while 42% belong to diverse ethnic groups. As of the last count, there are 92 languages spoken at PFMC. We work with individuals of all ages, from newborns to seniors, and our patient demographic is comprised of 65% females, 28% males, and 7% non-binary individuals.

In addition to our patient care services, PFMC serves as the continuity care clinic for the Alaska Family Medicine Residency (AKFMR), the only family medicine residency in Alaska. AKFMR partners with the University of Washington and the WWAMI (Washington, Wyoming, Alaska, Montana, and Idaho) Family Medicine Residency Network, aiming to provide comprehensive education for its residents. Our mission is to develop competent family medicine physicians who deliver high-quality care to diverse populations, particularly those in rural, culturally diverse, and underserved communities throughout Alaska. We believe that graduates from our residency program are equipped to excel in diverse settings, including rural outpatient practices, urban underserved environments, and international medical contexts.

Internship Experience

We are dedicated to enhancing primary care through our comprehensive Primary Care Behavioral Health (PCBH) doctoral intern training program. Our interns receive extensive education and practical experience within the PCBH model, which emphasizes collaboration among behaviorally trained primary care providers (Doctoral Interns,

Postdoctoral Fellows, and Faculty Psychologists), medically trained primary care providers (Resident and Faculty Physicians), and other healthcare providers (Nurses, Social Workers, and Pharmacists). This interdisciplinary teamwork fosters a collaborative environment that not only enriches the interns' learning experience but also significantly improves patient care. By integrating behavioral and medical health approaches, we promote a holistic model of care that addresses the diverse needs of our patients.

The intern experience begins with an immersive PCBH "bootcamp," designed to provide a solid foundation in the PCBH model practiced at our clinic. This comprehensive onboarding experience includes interdisciplinary training alongside resident physicians and other members of the PFMC care team, offering interns valuable opportunities for relationship building and collaboration. In addition to team-focused training, interns receive initial instruction in focused acceptance and commitment therapy (FACT) and "one-at-a-time" interventions. This foundational knowledge is progressively developed throughout the training year, as interns encounter increasingly challenging training opportunities and are given greater expectations for autonomy. This structured approach ensures that interns are well-equipped to grow professionally, enhancing their skills and confidence in delivering integrated healthcare.

Interns provide care to patients during both medical appointments and scheduled follow-up visits. Their treatment often concentrates on managing chronic diseases and psychological disorders, including depression, anxiety, post-traumatic stress disorder, and substance use disorders. Each intern is required to gain experience in specialty clinics that focus on areas such as refugee mental health, maternal mental health, addiction medicine, geriatrics, and/or chronic pain management.

Interns are full-time employees of PFMC and are expected to work 40 hours per week, Monday through Friday, from 8:00 a.m. to 5:00 p.m. During the year, interns will be expected to maintain weekly behavioral health consultation clinics, follow-up clinics, provide consultation to the interdisciplinary team, and conduct behavioral health assessments.

Special Requirements of Applicants

Providence Hospital is a drug-free workplace. Interns who match with this site will be required to present for drug screening and an employee health appointment before being employed within the Providence Health System. All interns are required to pass the Providence drug screen.

Before beginning the internship, all AKFMR interns are required to pass a background check, as mandated by Alaska Statute 47.05.300-47.05.390. This check is conducted by the Alaska Department of Health and Social Services Background Check Unit. The history of a felony or misdemeanor may result in a fail in this review process and prevent the intern from working at AKFMR. See State of Alaska Barrier Crime Matrix for a complete listing of barrier crimes: <https://www.akcertification.org/wp-content/uploads/documents/Barrier-Crime-Matrix.pdf>. The background check occurs after the Match outcome.

Aleutian Pribilof Islands Association (APIA)

General Information

The Aleutian Pribilof Islands Association, Inc. (APIA), provides Health Services (Primary Care, Behavioral Health, Community Wellness and Prevention) in four communities across the Aleutian and Pribilof Islands. The four communities include Atka, Nikolski, St. George, and Unalaska. In addition, APIA serves the Anchorage community for those Medicaid eligible. Behavioral Health services are also provided in the Anchorage office, which will be the principal location of the AK-PIC training site. The mission of APIA Behavioral Health Services is to increase the quality of health in the service area by providing effective, continuous, and empathic treatment. Services include prevention, intervention, treatment, and continuing care. APIA provides individualized, culturally congruent treatment, utilizing a recovery model as a basis for treatment.

APIA's treatment philosophy is one of assisting individuals to develop an awareness of their strengths and using their identified strengths to succeed with the treatment plan. Interventions are not only diagnosis specific, but they are also specific to the phase of recovery and stage of change. All services are provided in an outpatient setting, both in-person and via telemedicine.

Behavioral health services include individual, couple, family, and group psychotherapy to address mental health concerns, substance abuse difficulties, and co-occurring disorders. The most common occurring mental health issues include depression and anxiety related mood disorders; however, APIA does address the full range of diagnosis from adjustment to schizophrenia. Substance abuse treatment services include alcohol and drug information school (ADIS), evaluation and risk measurement/prevention, and individual and group therapies. Psychological testing is provided to geriatric, adult, children, and adolescent clients dealing with a broad range of issues from mental competency, learning disabilities, personality, emotional, and behavioral diagnostic issues. Psychiatric services involving medication assessment and evaluation are also provided through contractual partners, in addition to providing outpatient behavioral health services. While not directly part of the internship experience, behavioral health staff work with Primary Care staff to provide holistic, integrated care in four APIA service communities. Behavioral health staff members also assist with community outreach and education events.

The Internship Experience

Interns will be exposed to a variety of treatment modalities (i.e., individual and group), across different media (i.e., in-person and telemedicine). Furthermore, interns will become familiar with administering a variety of psychological assessments in a culturally-sensitive manner dealing with diverse referral issues. Another distinctive component of APIA's training site is that all interns will be exposed to regional-based travel and work with community-based treatment providers, in the context of remote Native communities. This will ultimately prepare them for working in the mental health and substance abuse field in rural and remote Alaska. Interns will be full-time employees of the APIA, and expected to work Monday through Friday during business hours with rare opportunities for weekend travel. Interns will be based in Anchorage and will travel to one of APIA's regional service communities on a quarterly basis, at a minimum, for approximately one-week in duration per trip. These trips are for immersion in life in rural settings, exposure to culture in the region, and not specifically clinical in nature. Travel expenses for these trips are covered by APIA.

Special Requirements of Applicants

Prior to beginning internship, all APIA interns must pass a background check per Alaska Statute 47.05.300-47.05.390. This check is conducted by the Alaska Department of Health and Social Services Background Check Unit. The background check occurs after the Match outcome. History of a felony or misdemeanor may result in failing in the review process and prevent the intern from working at APIA. See State of Alaska Barrier Crime Matrix for a full listing of barrier crimes:

Program Disclosures

As articulated in Standard I.B.2, programs may have “admission and employment policies that directly relate to affiliation or purpose” that may be faith-based or secular in nature. However, such policies and practices must be disclosed to the public. Therefore, programs are asked to respond to the following question.

Does the program or institution require students, trainees, and/or staff (faculty) to comply with specific policies or practices related to the institution’s affiliation or purpose? Such policies or practices may include, but are not limited to, admissions, hiring, retention policies and/or requirements for completion that express mission and values.	<u> x </u> Yes <u> </u> No

Internship Program Admissions

Briefly describe in narrative form important information to assist potential applicants in assessing their likely fit with your program. This description must be consistent with the program's policies on intern selection and practicum and academic preparation requirements:

AK-PIC Training Sites

The consortium includes three sites: Alaska Psychiatric Institute, Aleutian Pribilof Islands Association, and Providence Family Medicine Center/Alaska Family Medicine Residency. Details on each site's financial support are provided below.

The consortium offers one-year, full-time internships starting and ending in June. The consortium is comprised of organizations in Alaska and provides varied clinical and didactic experiences essential for professional practice in Alaska's diverse communities. Interns will have a primary placement at one site while engaging in weekly cross-site training and experiential activities. By the end of the internship, interns will complete a minimum of 500 hours of face-to-face direct service.

Does the program require that applicants have received a minimum number of hours of the following at time of application? If Yes, indicate how many:

Total Direct Contact Intervention Hours: **No**

Total Direct Contact Assessment Hours: **No**

Describe any other required minimum criteria used to screen applicants:

Applicants must be currently enrolled and in good standing in an APA-accredited doctoral program. Strong preference will be given to those who have:

1. At least 500 intervention hours.
2. A minimum of 50 assessment hours.
3. Completed at least 5 integrated assessment reports.
4. Defended their dissertation proposal before the internship begins.
5. Relevant experience or a special interest in working with diverse populations.

Aleutian Pribilof Islands Association | Alaska Psychiatric Institute
Providence Family Medicine Center/Alaska Family Medicine Residency

NONDISCRIMINATION POLICY

DIVERSITY AND NONDISCRIMINATION

The Alaska Psychology Internship Consortium (AK-PIC) strongly values diversity and believes in creating an equitable, hospitable, appreciative, safe, and inclusive learning environment for its interns. Diversity among interns and supervisors enriches the educational experience, promotes personal growth, and strengthens communities and the workplace. Every effort is made by AK-PIC to create a climate in which all staff and interns feel respected, comfortable, and in which success is possible and attainable. AK-PIC fosters an understanding of cultural and individual diversity as it relates to professional psychology. AK-PIC's training program includes an expected competency in diversity training, and multiple experiences are provided to be sure that interns are both personally supported and well-trained in this area. AK-PIC avoids any actions that would restrict program access or completion on grounds that are irrelevant to success in the training program or the profession.

AK-PIC welcomes applicants from diverse backgrounds and underrepresented communities. The consortium believes that a diverse training environment contributes to the overall quality of the program. AK-PIC provides equal opportunity to all prospective interns and does not discriminate because of a person's race, color, religion, sex, national origin, age, disability, or any other factor that is irrelevant to success as a psychology intern. Applicants are individually evaluated in terms of quality of previous training, practicum experiences, and fit with the internship.

Reviewed and approved by AK-PIC Faculty on 04/24/26

ADMINISTRATIVE AND FINANCIAL ASSISTANCE

STIPEND

The annual stipend at the Providence Family Medicine Center (PFMC) and Aleutian Pribilof Islands Association (APIA) will be \$35,000. The annual stipend at the Alaska Psychiatric Institute (API) will be \$40,000.

BENEFITS

All interns are required by the consortium to have current health insurance coverage. Access to health benefits will be provided to all interns but may vary across sites. Annual vacation, professional, and sick leave will be available to all interns. All interns are responsible for ensuring they secure medical coverage by the beginning of the internship year (note some insurance companies have more lengthy review and approval processes prior to approving coverage). All interns are required to submit proof of health insurance coverage at the beginning of internship and upon request.

With regard to medical and/or family leave extensions during the internship year, agency parameters will dictate extended leave options. Interns are responsible for discussing leave requests with their supervisor and working in coordination with HR departments. Not all sites have the ability to provide extensions.

Leave such as vacation, professional, or sick leave will be available to all interns and depend on site-specific policies. In addition, AK-PIC interns have access to numerous resources. Funding for travel within the state of Alaska is provided in order for interns to complete required training experiences. Assessment and other training materials are provided by each training site, and additional materials that may be needed can be purchased using consortium funding with Training Committee approval. Additionally, each intern has access to administrative and IT support through their primary training site.

Updated & approved by AK-PIC Faculty on 04/24/26

REQUIREMENTS FOR SUCCESSFUL INTERNSHIP PERFORMANCE

(Including expected competencies and minimal levels of achievement for completion)

EXPECTED COMPETENCIES

The Alaska Psychology Internship Consortium (AK-PIC) requires that interns demonstrate minimum levels of achievement across all training competencies, as outlined in the competencies. Interns are formally evaluated by their primary supervisor twice annually, at the midpoint and end of the internship year. The evaluation form includes information about the interns' performance regarding all of AK-PIC's expected competencies and the related training elements.

Additionally, all AK-PIC interns are expected to complete 2000 hours of training during the internship year of which a minimum are 500 direct contact hours. Meeting the hours requirement and obtaining sufficient ratings on all evaluations demonstrates that the intern has progressed satisfactorily through and completed the internship program. Feedback to the interns' home doctoral program is provided at the culmination of the internship year. Doctoral programs are contacted within one month following the end of the internship year and informed that the intern has successfully completed the program.

In addition to the evaluations described above, interns must complete a self-evaluation form at the beginning, mid-year, and end of the internship (for a total of 3 self-evaluations a year). Additionally, interns will complete a program evaluation survey at the mid-year and end of the internship year, in order to provide feedback that will inform any changes or improvements in the training program.

MINIMAL LEVELS OF ACHIEVEMENT FOR COMPLETION

In addition to completing 2000 hours of training (including 500 direct contact hours) during the internship year, a minimum level of achievement on each evaluation is required.

At the end of internship, a minimum level of achievement on each evaluation is defined as a rating of "4" for each overall competency.

The rating scale for each evaluation is a 5-point Likert scale, with the following rating values:

- | |
|---|
| *1 - Functioning below the minimal level expected during internship. Substantial supervision required on all cases/projects. Intern demonstrates little to no autonomous judgment; poor clinical judgment and/or safety concerns are identified. Supervisor has little to no confidence in the intern's ability to function independently. |
| **2 - Functioning at a lower than expected level based on intern's developmental training experience. Supervision required on most straightforward cases/projects and there are rising concerns about intern's clinical judgment. |
| 3 - Functioning at a level consistent with developing competence. This level of functioning is typical for the midpoint of internship training. Regular supervision may be required on complex cases/projects and in new skill areas. |
| 4 - Functioning at a level consistent with entry-level practice at end of year. At mid-point, this rating indicates periodic supervision is required on challenging cases/projects and in new skill areas. Most cases/projects need consultation only. |
| 5 - Functioning at an autonomous level, with skill representing that expected beyond the consultation of internship training. Demonstrates sound critical thinking/judgment. Some consultation may be needed in advanced or specialized area(s). |

If an intern receives an average rating of a "2" or below on one or more of the nine training competencies, or if supervisors have reason to be concerned about the intern's performance or progress, the program's due process procedure will be initiated. The due process procedure can be found on AK-PIC's website: <https://ak-pic.org/policies/>

Updated & Approved by AK-PIC Faculty on 4/24/26

SUPERVISION REQUIREMENTS POLICY

GENERAL SUPERVISION

AK-PIC recognizes the rights of interns and faculty to be treated with courtesy and respect. To maximize the quality and effectiveness of the interns' learning experiences, all interactions among interns, training supervisors, and faculty/staff are collegial and conducted in a manner that reflects the highest standards of the profession. AK-PIC faculty inform interns of these principles and of their avenues of recourse should problems arise through policies that are available at ak-pic.org and in the AK-PIC Intern Orientation Handbook.

AK-PIC faculty regularly schedule supervision and are accessible for consultation to interns when they are providing clinical services. AK-PIC faculty provide interns with a level of observation, guidance, and supervision that encourages successful completion of the internship. Faculty serve as professional role models and engage in actions that promote interns' acquisition of knowledge, skills, and competencies consistent with AK-PIC's training aims.

One licensed psychologist serves as primary clinical supervisor for each intern. Interns receive a minimum of two (2) hours of individual supervision each week from a licensed psychologist. Supplemental weekly individual supervision may be provided by other appropriately credentialed professionals at the training site. Interns also have consistent access to other supervisory staff and are expected to utilize those staff in the event that non-scheduled consultation or crisis coverage is required when the primary supervisor is off-site.

Interns receive a minimum of two (2) hours of group supervision each week, one at the primary training site, and one across AK-PIC sites. AK-PIC group supervision is led by each member of the core faculty on a rotating basis, in order to provide all interns with the opportunity to experience a breadth of supervisory relationships beyond their primary supervisor. For all clinical cases discussed during AK-PIC group supervision, full professional responsibility remains with the intern's primary supervisor, and any crises or other time-sensitive issues are reported to that supervisor immediately.

All interns will receive a total minimum of 4 hours per week of supervision.

TELESUPERVISION

The Alaska Psychology Internship Consortium uses HIPAA compliant videoconferencing on occasion to provide individual or group supervision to interns working in remote locations.

Reviewed & Approved by AK-PIC Faculty on 04/24/26

INTERN PERFORMANCE EVALUATION, FEEDBACK, RETENTION AND TERMINATION DECISIONS

INTERN PERFORMANCE EVALUATION AND FEEDBACK

The Alaska Psychology Internship Consortium (AK-PIC) requires that interns demonstrate minimum levels of achievement across all training competencies. The Intern Competency Evaluation is completed by their primary supervisor twice annually, at mid-year and end of the internship year. Evaluations are conducted using a standard rating form, which includes comment spaces where supervisors include specific written feedback regarding the interns' performance and progress. The Intern Competency Evaluation includes information about the interns' performance regarding all of AK-PIC's expected training competencies and the related objectives. Intern Competency Evaluations are based in part on direct observation of the intern as well other performance-based activities. Supervisors are expected to review these evaluations with the interns and provide an opportunity for discussion if the intern has questions or concerns about the feedback.

At the end of internship, achieving full competence is defined as a minimum rating of "4" for each of the nine training competencies, as well as an aggregate of "4" across all training competencies.

The rating scale for each evaluation is a 5-point Likert scale, with the following rating values:

*1 - Functioning below the minimal level expected during internship. Substantial supervision required on all cases/projects. Intern demonstrates little to no autonomous judgment; poor clinical judgment and/or safety concerns are identified. Supervisor has little to no confidence in the intern's ability to function independently.
**2 - Functioning at a lower than expected level based on intern's developmental training experience. Supervision required on most straightforward cases/projects and there are rising concerns about intern's clinical judgment.
3 - Functioning at a level consistent with developing competence. This level of functioning is typical for the midpoint of internship training. Regular supervision may be required on complex cases/projects and in new skill areas.
4 - Functioning at a level consistent with entry-level practice at end of year. At mid-point, this rating indicates periodic supervision is required on challenging cases/projects and in new skill areas. Most cases/projects need consultation only.
5 - Functioning at an autonomous level, with skill representing that expected beyond the consultation of internship training. Demonstrates sound critical thinking/judgment. Some consultation may be needed in advanced or specialized area(s).

If an intern receives an average rating of a “2” or below on one or more of the nine training competencies, or if supervisors have reason to be concerned about the intern’s performance or progress, the program’s due process procedure will be initiated. The due process procedure can be found on AK-PIC’s website: <https://ak-pic.org/policies/>

Additionally, all AK-PIC interns are expected to complete 2000 hours of training (including 500 direct contact hours), during the internship year. Meeting the hours requirement and obtaining sufficient ratings on all evaluations demonstrates that the intern has progressed satisfactorily through and completed the internship program. Feedback to the interns’ home doctoral program is provided at the culmination of the internship year. Doctoral programs are contacted within one month following the end of the internship year and informed that the intern has successfully completed the program.

In addition to the Intern Competency Evaluations described above, interns must complete a Self-Evaluation at the beginning, mid-year, and end of the internship. Self-Evaluations are conducted to guide training plans, progress, and goals. Low scores (ratings of 1 or 2) on Self-Evaluations do not trigger due process. Interns also complete a Program Evaluation Survey at the mid-year and end of the internship year, in order to provide feedback to inform any changes or improvements in the training program.

RETENTION AND TERMINATION DECISIONS

If successful completion of the program comes into question at any point during the internship year, or if an intern enters into the formal review step of the due process procedure due to a grievance by a supervisor or an inadequate rating on an evaluation, the home doctoral program will be contacted within 30 days. This contact is intended to ensure that the home doctoral program, which also has a vested interest in the interns’ progress, is kept engaged in order to support an intern who may be having difficulties during the internship year. The home doctoral program is notified of any further action that may be taken by AK-PIC as a result of the due process procedure, up to and including termination from the program.

Updated and approved by AK-PIC Faculty on 04/24/26

INTERN RECRUITMENT AND SELECTION POLICY

INTERN RECRUITMENT

The Alaska Psychology Internship Consortium (AK-PIC) offers several full-time positions each internship year across the multi-site consortium (Alaska Psychiatric Institute; Aleutian Pribilof Islands Association; Providence Family Medicine Center/Alaska Family Medicine Residency). The number of positions varies based on funding within each site and is announced in advance through the APPIC website.

AK-PIC generally recruits applicants who:

1. Demonstrate sustained and specific interest in, and readiness for, focused training in the unique challenges of practicing psychology in rural and remote settings and to ensure clinical competency in working with Alaska's various cultural groups;
2. Demonstrate interest and ability in site's population and treatment model and communicates a good fit between the site and the intern's unique background, interests, experiences, and abilities;
3. Have enough clinical experience and/or skill to effectively work with clients who experience a complexity of needs across biopsychosocial domains (with supervisory support);
4. Have skills and sensitivity regarding multicultural issues, and willingness to continue to grow in this area; and
5. Demonstrate maturity, professionalism, and a commitment to on-going development and working within an interdisciplinary team setting.

AK-PIC recruits applicants from diverse backgrounds. The Consortium believes a diverse training environment contributes to the program's overall quality. AK-PIC does not engage in discrimination against, or harassment of any person employed or seeking employment within our consortium on the basis of race, color, national origin, religion, sex, gender, gender expression, gender identity, pregnancy, physical or mental disability, medical condition, genetic information, ancestry, marital status, age, sexual orientation, or service in the uniformed services. This policy applies to all practices, including recruitment, selection, salary, training, and development. This policy is intended to be consistent with applicable state and federal laws and site-specific policies. AK-PIC also prohibits sexual harassment and addresses any such grievance in collaboration with each site's Human Resource Department.

In addition, if sites are receiving Health Resources and Services Administration funds, including Providence Family Medicine Center/Alaska Family Medicine Residency and Aleutian Pribilof Islands Association, can only grant interviews to applicants who are United States (US) citizens, non-citizen nationals of the US, or a foreign national who possesses a visa permitting permanent residence in the US.

www.ak-pic.org

APPLICATION PROCESS

Students interested in applying for the internship program submit an online application through the APPIC website (www.appic.org). Applicants apply to as many or as few training sites within AK-PIC as they choose. Applicants designate the training sites by selecting the appropriate Match Number when submitting the application. Only one complete application is required for consideration to any of the sites in the consortium.

A complete application package consists of the following materials:

1. A completed online AAPI;
2. Cover letter stating your preferred training site(s) and why you are interested in those sites specifically;
3. A current Curriculum Vitae;
4. Three letters of recommendation, two of which must be from persons who have directly supervised your clinical work (no more than three letters); and,
5. Official transcripts of all graduate coursework.

All application materials must be received by the deadline to be considered. AK-PIC faculty members may choose to call references for additional information in December or January of the interview year. If applicants are invited to an interview, they will be notified by email on or before the interview notification date. At that time, they will also be informed of the sites for which they have been selected to interview. AK-PIC conducts all interviews via videoconferencing.

INTERN SELECTION

REQUIRED PRIOR DOCTORAL PROGRAM PREPARATION AND EXPERIENCES

Education: All applicants must be a current doctoral-level student in good standing in an APA-accredited counseling or clinical psychology program. Must be certified by the academic program as being ready for an internship.

Background Check: Candidates who match with AK-PIC must successfully complete a State of Alaska background check (including fingerprinting) prior to being appointed for internship. Final hiring for the internship is contingent upon clearing the general background check, as well as medical staff office reviews at each site. The AK-PIC brochure provides detailed information on the requirements for each individual site.

PREFERRED QUALIFICATIONS

AK-PIC will base its selection process on the entire application package noted above; however, strong preference is given to applicants who have met the following qualifications prior to beginning internship:

1. A minimum of 500 intervention hours;
2. A minimum of 50 assessment hours;
3. A minimum of 5 integrated assessment reports;
4. Dissertation proposal defense scheduled to occur prior to the beginning of internship;
5. Experience or special interest in working with diverse populations;

In addition to the preferences noted above, AK-PIC considers the potential commitment or interest of any prospective intern to remain in Alaska after an internship. Developing a strong behavioral health workforce is an important consideration for the state, and an interest in remaining in Alaska to join the workforce will be considered a benefit in a potential intern.

Updated and approved by AK-PIC Faculty on 04/24/26

GRIEVANCE POLICY AND PROCEDURES

GRIEVANCE SUBMISSION AND RESOLUTION PROCESS

These guidelines are intended to provide the doctoral psychology intern with a means to resolve perceived conflicts. Interns who pursue grievances in good faith will not experience any adverse professional consequences. For situations in which an intern raises a grievance about an AK-PIC supervisor, staff member, and/or trainee, the following process will be followed. If the grievance is filed against non-AK-PIC professionals and the AK-PIC Training Committee determines the grievance has merit, the issue will be turned over to the employer agency.

INFORMAL REVIEW

The grieved individual should first raise the issue with the involved supervisor, staff member, or other trainee. If this level of intervention is unsatisfactory, the grieved individual should then seek support from the Training Director (TD) or, in the case of a conflict of interest, another faculty member in an effort to informally resolve the problem. The TD or faculty member will intervene in an informal manner attempting to resolve the grievance.

If this grievance is not resolved through the informal process, the TD or faculty member will initiate the formal review process. This decision to move into a formal review process will be made in collaboration with the grieved individual. Based on the nature of the grievance, faculty may initiate the formal review process in situations related to ethical, legal, and risk management violation.

AK-PIC Training Committee will determine the appropriate approach, including but not limited to, conflict resolution, mediation, or other appropriate form of resolution. The TD or faculty member will document the process and outcome of the informal review.

FORMAL REVIEW

If the matter cannot be satisfactorily resolved using informal means, the following will happen:

- A. A formal grievance in writing will be submitted by the grieved individual to the TD or designated faculty. The grievance will be reviewed by at least 3 members of the Training Committee determined by the TD or ATD as appropriate.
- B. The 3 selected members of the Training Committee will review the grievance, speak with the relevant parties, gather additional information, and develop a proposed plan of action.
- C. The findings and proposed plan of action will be brought to the AK-PIC Training Committee for approval.

- D. The approved plan of action will be put in writing and communicated with all relevant parties. Implementation will be monitored by the 3 selected members of the Training Committee.
- E. If the plan of action resolves the grievance, a letter of resolution will be drafted, approved by AK-PIC Training Committee, and the grievance will be closed. All relevant documents will be kept on file, indefinitely.

If the matter cannot be satisfactorily resolved through the formal plan of action, the following will happen:

- A. If the grievance is filed against an AK-PIC intern, AK-PIC due process can be initiated, by the AK-PIC Training Committee.
- B. If the grievance is filed against AK-PIC faculty, AK-PIC can turn over the grievance to the employer agency or APPIC as appropriate.

TIMELINE OF RESPONSE

The grievance resolution process contains many steps. AK-PIC faculty will make every effort to address grievances in a timely manner. Each phase of correspondence/communication may take up to 10 business days.

Updated & Approved by AK-PIC Faculty on 04/24/26

DUE PROCESS POLICY AND PROCEDURES

DUE PROCESS AND RESOLUTION

POLICY

AK-PIC has developed a due process and resolution process, which focuses on the prevention of and timely response to identified problems. This ensures that decisions made by the consortium are not arbitrarily or personally based and identifies specific steps that are applied to all interns. Further, clearly identified steps and a process are provided for an intern to address an issue with some aspect of the training program or one of its members.

Doctoral-level psychology interns are expected to maintain the highest standards of personal conduct, integrity, and professionalism. They are expected to support and comply with APA Ethical Guidelines and to utilize supervision effectively in order to grow professionally. It also is the responsibility of the intern's clinical supervisor and the AK-PIC faculty to ensure that high standards of professionalism are attained by the interns under their supervision. Maintenance of these standards will promote effectiveness of both the professional training provided by the internship and the quality of psychological work provided by the interns to clients and constituent communities of the consortium agencies.

GENERAL DUE PROCESS GUIDELINES

Due process includes steps that assure fair evaluation of intern performance, intern awareness of options for resolution of performance issues and clearly defined steps for notice, hearing, and appeal.

General guidelines for due process at AK-PIC include the following:

- A. The AK-PIC Training Committee will present AK-PIC's program expectations for professional functioning to interns in writing, at the start of the training period. This is discussed in a group format during orientation and may be followed up individually during supervision. **Interns sign an acknowledgement indicating receipt and understanding of, and agreement to abide by, these guidelines and other AK-PIC policies.**
- B. The process for evaluation of interns is clearly described during orientation. Interns will be formally evaluated at least two times annually by their primary supervisor. The written evaluation is based on APA criteria and includes the profession-wide competencies of:
 1. Research
 2. Ethical and legal standards
 3. Individual and cultural diversity
 4. Professional values, attitudes, and behaviors
 5. Communication and interpersonal skills

www.ak-pic.org

6. Assessment
 7. Interventions
 8. Supervision
 9. Consultation and inter-professional/interdisciplinary skills
- C. The various procedures and actions involved in decisions regarding inadequate skills or problematic behaviors are described to interns.
- D. The Training Director (TD) and/or site clinical supervisor will communicate early and often with academic programs about any difficulties with interns.

PROBLEMATIC BEHAVIOR

For purposes of this document, intern problem behavior is defined broadly as an interference in professional functioning which is reflected in one or more of the following ways:

- an inability and/or unwillingness to acquire and integrate professional standards into one's repertoire of professional behavior,
- an inability to acquire professional skills in order to reach an acceptable level of competency, and/or,
- an inability to control personal stress, psychological dysfunctions, and/or excessive emotional reactions which interfere with professional functioning.

It is a professional judgment as to when an intern's behavior becomes problematic rather than of concern. Trainees may exhibit behaviors, attitudes or characteristics that, while of concern and requiring remediation, are not unexpected or excessive for professionals in training. Problems typically become identified as impairments when they include one or more of the following characteristics:

- the intern does not acknowledge, understand, or address the problem when it is identified;
- the problem is not merely a reflection of a skill deficit which can be rectified by academic or didactic training;
- the quality of services delivered by the intern is sufficiently negatively affected;
- the problem is not restricted to one area of professional functioning;
- a disproportionate amount of attention by training personnel is required;
- the trainee's behavior does not change as a function of feedback, remediation efforts, and/or time;
- the problematic behavior has potential for ethical or legal ramifications if not addressed;
- the intern's behavior negatively impacts the public view of the agency;
- the problematic behavior negatively impacts the intern class.

INFORMAL REVIEW

When a supervisor or AK-PIC faculty member believes that an intern's behavior is becoming problematic, the first step in addressing the issue should be to raise the issue with the intern directly in an attempt to informally resolve the problem. This notice should be documented in writing, but will not become part of their professional file.

FORMAL REVIEW

If an intern's problem behavior persists following an attempt to resolve the issue informally, if an intern has a grievance against them that is not resolved satisfactorily, or if an intern receives an average rating of a "2" or below on a broad competency on an Intern Competency Evaluation, the following notice and process is initiated:

- A. The supervisor will meet with the TD and intern to discuss the problem and determine what action needs to be taken to address the issue. If the TD is the intern's direct supervisor, the Associate Training Director (ATD) will be included in the meeting.
- B. The intern will have the opportunity to provide a written statement related to their response to the problem.
- C. After discussing the problem and the intern's response, the supervisor and TD:
 1. Will issue an "Acknowledge Notice" which formally acknowledges some or all of the following
 - a. faculty is aware of and concerned with the problem,
 - b. problem has been brought to the attention of the intern,
 - c. faculty will work with the intern to specify the steps necessary to rectify the problem or skill deficits addressed by the inadequate evaluation rating,
 - d. problem is not significant enough to warrant serious action,
 - e. written notice will be submitted to the intern and the Director of Clinical Training at the trainee's graduate institution.
 2. May place the intern on probation which monitors for a specific length of time the degree to which the intern improves the problematic behavior or skill deficit. The probation is a written statement to the intern and the Director of Clinical Training at the trainee's graduate institution and includes:
 - a. the actual behaviors or skills associated with the problem,
 - b. the specific recommendations for rectifying the problem,
 - c. the time frame for the probation during which the problem is expected to be resolved, and
 - d. the procedures designed to determine whether the problem has been rectified.

3. The Training Committee may decide to temporarily suspend an intern's clinical activities or place an intern on administrative leave during this period prior to a final decision being made, if warranted.
4. If the problem is not rectified through the above processes, the intern's placement within AK-PIC may be terminated.

INTERN TERMINATION

- A. If the problem represents gross misconduct or ethical violations that have the potential to cause harm, the intern's placement within AK-PIC may be terminated.
- B. If the intern's employment is terminated by the site, the intern's placement within AK-PIC may be terminated.
- C. The final decision to terminate an intern's placement would be made by the entire AK-PIC Training Committee and would represent a discontinuation of participation by the intern within every aspect of the consortium. The AK-PIC Training Committee would make this determination during the regularly-scheduled monthly AK-PIC Training Committee meeting.
- D. AK-PIC will adhere to APPIC's Policies on intern dismissal and secure a release from the Match contract.

APPEAL AND REVIEW PANEL

An intern has the right to appeal decisions made by the AK-PIC Training Committee through the following process:

- A. The intern must file a formal appeal in writing with all supporting documents to the TD and/or ATD within 5 business days from their notification of any of the above (notification, remediation, or termination).
- B. The appeal review will be conducted by at least 3 members of the Training Committee determined by TD or ATD as appropriate. The intern may request a specific member of the AK-PIC Training Committee to serve on the review panel.
- C. The Training Committee will have two weeks to complete the appeal review. In addition to reviewing all written materials, they may seek information from relevant people and sources. They may uphold, dismiss, or modify the decisions made previously. The Training Committee has final discretion regarding the outcome.
- D. Should the intern disagree with the appeal decision, they may further appeal with APPIC Standards and Review Committee (<https://share.google/qCdTDoa9vzh0ACTFe>).

MAINTENANCE OF RECORDS POLICY

RECORD RETENTION

The Alaska Psychology Internship Consortium (AK-PIC) permanently maintains all intern records. Our records are kept in an electronic system that is encrypted. Passwords are only provided to those individuals approved by AK-PIC Faculty and essential to the functioning of our consortium.

INTERN PERFORMANCE

The Alaska Psychology Internship Consortium documents and permanently maintains accurate records of the interns' training experiences, evaluations, and certificates of internship completion for evidence of the interns' progress through the program and for future reference and credentialing purposes. Additionally, AK-PIC informs interns of its records retention policy.

GRIEVANCES

AK-PIC keeps record of all formal AK-PIC grievances filed against the program and/or individuals associated with the program since its last accreditation site visit. This information is tracked in an electronic log, and the records are stored in our electronic system. AK-PIC is aware that the Commission on Accreditation will examine a program's records of intern complaints as part of its periodic review of the program.

Reviewed & Approved by AK-PIC Faculty on 04/24/26

DIDACTIC ATTENDANCE AND DELIVERY POLICY

Attendance at the weekly didactic seminars and other scheduled group training activities is mandatory for all interns in the Alaska Psychology Internship Consortium and is required for successful completion of the internship. Attendance at these scheduled activities should take priority over other site obligations each week. Site supervisors are aware of these activities and their requirements for interns. The didactic seminar will be in-person or via videoconference.

A schedule for the didactic seminars will be distributed at the beginning of each year and is updated throughout the year. Revisions will be provided on a periodic basis throughout the year. Attendance at each seminar meeting is tracked by the AK-PIC consortium. No unexcused absences are allowed. Absences must be discussed and approved by the primary supervisor prior to the didactic. It is the responsibility of the intern to inform the AK-PIC faculty and intern cohort of a future absence from didactics. Pre-approved intern vacation and alternative training opportunities are considered excused absences. Interns must inform all faculty of the excused absence at least one week prior to didactics. Interns who miss a meeting of the didactic seminar because of a serious emergency or for a serious illness should alert the AK-PIC faculty as soon as possible. If a pattern of didactic absences emerges, the site supervisor will address the intern and bring it to the AK-PIC Training Committee for resolution. Didactic absences will be reviewed at quarterly meetings.

Updated and approved by AK-PIC Faculty on 04/24/26

DISSERTATION POLICY

The Alaska Psychology Internship Consortium (AK-PIC) is an intensive program which seeks to provide comprehensive training to doctoral interns. To this end, interns must complete the entirety of the 2000 required training hours, without exception. While interns are welcome to utilize paid time off (PTO) days for work on their dissertations, AK-PIC does not permit additional time off beyond what is allowable in their employment contract for this purpose. Reasonable accommodations will be made for interns who must utilize leave time to complete their dissertation defense, provided that this leave does not prevent the intern from completing the 2000 hour training requirement.

Reviewed and Approved by AK-PIC Faculty on 04/24/26

INTERN PUBLICATION POLICY

AK-PIC interns are encouraged to pursue academic and research related activities as an important aspect of professional development throughout their internship and career. AK-PIC faculty are to be informed of any research activities that interns are participating in during the intern year. It is expected interns will not identify themselves as representing AK-PIC on published works. If the research occurred as a direct product of the internship training program, the affiliation is with the site organization and approved by the site supervisor and in compliance with the site's research/publication policies. Interns conducting research outside of the internship training can utilize their university as an affiliation.

The Duty to Record: Ethical, Legal, and Professional Considerations for Alaska Psychologists

Introduction

The American Psychological Association Practice Directorate has provided an excellent online presentation about electronic healthcare records (EHRs) and the basic terminology related to EHRs; the presentation dispels common myths about EHR systems and provides detail about their meaningful use in integrated health care settings.¹

The Division 31 and 42 EHR working group's² primary goal was to create a series of State specific templates that would work well for psychologists as they transition into the use of EHRs, particularly in integrated health care settings where shared information is clinically essential and specific laws or regulations may dictate at least some of what is included in those records. To achieve this goal, we conducted a review of the laws related to record keeping, and the relevant and recent literature (particularly the last decade) regarding EHRs, including variations across states. Further, we consulted with key psychologists that have been using EHRs on a day to day basis, who have developed experience establishing policies and processes within their own institutions and practices. They have effectively used this developing technology to improve clinical care while protecting patient rights. They have found that the EHR enables collaborating professionals within the integrated health care settings to understand the behavioral risk factors that exist in each case and to be kept informed about the health behavior changes that occur with psychological service interventions (HRSA, 2012).³

In order to digest the laws accurately, we examined the annotated codes and regulations available on Westlaw and Lexis for the 50 states and the District of Columbia with reference to several relevant state-by-state surveys retrieved from Lexis

and Westlaw.⁴ Our research answered the following questions for each jurisdiction: (a) Do record keeping duties created by statutes or administrative rules exist? (b) Have court rulings created a common-law duty or interpreted the statutes or administrative rules? (c) What are the contents of the record that are mandated by law? (d) Are there laws related to the maintenance and security of records? (e) What are the laws related to retention of records? (f) What are the consequences of violating specific duties?

Readers should view the narrative summary of their jurisdiction's law as a starting point for interpreting how to meet the law within their own jurisdiction as they construct their electronic records. As laws can change, please check the law with your state associations to see if more current interpretations for meeting the record keeping duties. Many state professional associations have ethics committees that can be consulted as part of their benefits. In addition, your association can refer psychologists for individual consultation to lawyers specializing in legal practices focused on *mental health practice*. The professional liability carriers also provide free legal and professional consultation.

Alaska specific templates for the types and contents of the record are provided based upon a review of your jurisdiction's law. The digest of your jurisdiction's law should be read if you intend to use the templates.

State Specific Template for contents of a record

Alaska law calls for an intake and evaluation note, and progress notes. The contents of the two templates for these documents comply with the law digested below. We also believe that a termination note will likely reduce exposure to arguments about continued duty of care, and reduces the risk of responsibility in a duty to protect/warn jurisdiction.⁵

Because the documents permit hovering over the underline fields with a cursor to select an option (click then select) or permit filling in the shaded text boxes, they

⁵ Benjamin, G. A. H., Kent, L., & Sirikantraporn, S. (2009). Duty to protect statutes. In J. L. Werth, E.R. Welfel, & G. A. H. Benjamin (Eds.), *The duty to protect: Ethical, legal, and professional responsibilities of mental health professionals* (pp. 9 – 28). Washington, DC: APA Press. doi:10.1037/11866-002.

cannot be inserted into this document.⁶ Please access each of the documents.

Our group also suggests that users of the templates consider how “behavior may be shaped by culture, the groups to which one belongs, and cultural stereotypes.”⁷ Whenever “Eurocentric therapeutic and interventions models”⁸ may impair the consideration of multicultural factors among the integrated health care team members, we urge that psychologists note the factors within the appropriate template fields. In light of the World Health Organization’s demonstrated commitment to the formulation of a diagnostic system that moves beyond biological causation and integrates the contributions of psychological, cultural, and social factors, and APA’s participation in the development of the *International Classification of Functioning, Disability and Health* (World Health Organization, 2010), our group recommends using ICD-10 whenever diagnoses are being made.⁹ The EHR templates permit drop down diagnoses using the ICD-10 functional diagnoses.

Statute or Rule

The Alaska Administrative Code incorporates by reference the American Psychological Association’s *Ethical Principles of Psychologists and Code of Conduct* (June 2003) (“APA Code of Ethics”),¹⁰ as well as the American Psychological Association’s

CODE tit. 12, § 60.185(a) (“The ethics to be adhered to by licensed psychologists and licensed psychological associates are the Ethical Principles of Psychologists and Code of Conduct (June 2003), of the American Psychological Association, Inc. Ethical Principles of Psychologists and Code of Conduct is incorporated by reference in this section.”). Copies of the APA Code of Ethics are available from American Psychological Association Order Department, 750 First Street, NE, Washington, D.C. 20002-4242 and on the APA’s website at <http://www.apa.org/ethics/code/principles.pdf> (last accessed Aug. 1, 2012) [hereinafter “APA CODE OF ETHICS”].

General Guidelines for Providers of Psychological Services (1987 edition) (“APA General Guidelines”).¹¹

Common Law

There is no case law interpreting the record keeping obligations for Alaska psychologists.

Contents of the record are mandated by law

Alaska adopted the APA Code of Ethics into its Administrative Code and the following standards regulate the content of psychological records kept by Alaska psychologists.¹² In addition, the Health Insurance Portability and Accountability Act (HIPAA)¹³ would apply to Alaska psychological records.

3.10 Informed Consent¹⁴

(a) When psychologists ...provide assessment, therapy, counseling or consulting services in person or via electronic transmission or other forms of communication, they obtain the informed consent of the individual or individuals using language that is reasonably understandable to that person or persons... (See also Standards [9.03, Informed Consent in Assessments](#); and [10.01, Informed Consent to Therapy](#).)

(b) For persons who are legally incapable of giving informed consent,

¹¹ ALASKA ADMIN. CODE tit. 12, § 60.185(b) (“The standards to be adhered to by licensed psychologists and licensed psychological associates rendering psychological services in the state are General Guidelines for Providers of Psychological Services, (1987 edition), of the American Psychological Association. General Guidelines for Providers of Psychological Services is incorporated by reference in this section.”). Copies of the General Guidelines for Providers of Psychological Services (1987) are available from the Order Department, American Psychological Association, P.O. Box 2710, Hyattsville, MD 20784 and on the APA’s website at <http://www.apa.org/about/policy/guidelines-providers.pdf> (last accessed Aug. 1, 2012) [hereinafter APA GENERAL GUIDELINES].

¹² ALASKA ADMIN. CODE tit. 12, § 60.185(a). The standards set forth herein reflect the text of the APA Code of Ethics effective as of August 1, 2012. This version of the APA Code of Ethics contains amendments to the June 2003 version of the APA Code of Ethics adopted on February 20, 2010. Note, however, that the Alaska Administrative Code does not reference the amended version of the APA Code of Ethics.

¹³ HIPAA, U.S. Government Printing Office Electronic Code Of Federal Regulations website at: [Subpart C--SECURITY STANDARDS FOR THE PROTECTION OF ELECTRONIC PROTECTED HEALTH INFORMATION](#) ; [Subpart E--PRIVACY OF INDIVIDUALLY IDENTIFIABLE HEALTH INFORMATION](#) (last accessed Aug. 1, 2012).

¹⁴ APA CODE OF ETHICS, *supra* note 10.

psychologists nevertheless (1) provide an appropriate explanation, (2) seek the individual's assent, (3) consider such persons' preferences and best interests, and (4) obtain appropriate permission from a legally authorized person, if such substitute consent is permitted or required by law. When consent by a legally authorized person is not permitted or required by law, psychologists take reasonable steps to protect the individual's rights and welfare.

(c) When psychological services are court ordered or otherwise mandated, psychologists inform the individual of the nature of the anticipated services, including whether the services are court ordered or mandated and any limits of confidentiality, before proceeding.

(d) Psychologists appropriately document written or oral consent, permission, and assent. (See also Standards [9.03, Informed Consent in Assessments](#); and [10.01, Informed Consent to Therapy](#).)

A HIPAA notice of privacy practices¹⁵ that delineates the psychologist's scope of and limitations of confidentiality works in tandem with the disclosure document provided to the patient during the informed consent process specified by Standards 3.10, 9.03, and 10.01.

4.04 Minimizing Intrusions on Privacy¹⁶

(a) Psychologists include in written and oral reports and consultations, only information germane to the purpose for which the communication is made.

Standard 4.04(a) suggests that psychologists focus the documentation in a manner that is very protective of their client's privacy rights.

6.06 Accuracy in Reports to Payors and Funding Sources¹⁷

In their reports to payors for services or sources of research funding, psychologists take reasonable steps to ensure the accurate reporting of the nature of the service provided or research conducted, the fees, charges, or payments, and where applicable, the identity of the provider, the findings, and

¹⁵ 45 CFR 164.502 (a)(1)(ii) & 45 CFR 164.506 (c); HIPAA, U.S. Government Printing Office Electronic Code Of Federal Regulations website at: [Subpart E--PRIVACY OF INDIVIDUALLY IDENTIFIABLE HEALTH INFORMATION](#) (last accessed Aug. 1, 2012).

¹⁶ APA CODE OF ETHICS, *supra* note 10.

¹⁷ *Id.*

the diagnosis. (See also Standards [4.01, Maintaining Confidentiality](#); [4.04, Minimizing Intrusions on Privacy](#); and [4.05, Disclosures](#).)

9.01 Bases for Assessments¹⁸

(a) Psychologists base the opinions contained in their recommendations, reports and diagnostic or evaluative statements,...on information and techniques sufficient to substantiate their findings. (See also Standard [2.04, Bases for Scientific and Professional Judgments](#).)

(b) Except as noted in [9.01c](#), psychologists provide opinions of the psychological characteristics of individuals only after they have conducted an examination of the individuals adequate to support their statements or conclusions. When, despite reasonable efforts, such an examination is not practical, psychologists document the efforts they made and the result of those efforts, clarify the probable impact of their limited information on the reliability and validity of their opinions and appropriately limit the nature and extent of their conclusions or recommendations. (See also Standards [2.01, Boundaries of Competence](#), and [9.06, Interpreting Assessment Results](#).)

(c) When psychologists conduct a record review or provide consultation or supervision and an individual examination is not warranted or necessary for the opinion, psychologists explain this and the sources of information on which they based their conclusions and recommendations.

9.02 Use of Assessments¹⁹

(a) Psychologists administer, adapt, score, interpret or use assessment techniques, interviews, tests or instruments in a manner and for purposes that are appropriate in light of the research on or evidence of the usefulness and proper application of the techniques...

9.10 Explaining Assessment Results²⁰

Regardless of whether the scoring and interpretation are done by psychologists, by employees or assistants or by automated or other outside services, psychologists take reasonable steps to ensure that explanations of results are given to the individual or designated representative...

¹⁸ *Id.*

¹⁹ *Id.*

²⁰ *Id.*

Standard 6.06 implies that information about the *nature of the service provided...*, *the fees charged, the identity of the provider, findings, and diagnosis* should be maintained in the record when necessary for billing purposes. In addition, the requirements of Arizona laws and the standards 9.01, 9.02, and 9.10 suggest that psychologists would use an intake and evaluation note, and progress notes templates.

Alaska also adopted the APA General Guidelines into its Administrative Code by reference²¹ and the following guidelines create specific record keeping obligations for Alaska psychologists:

2.3.2 Psychologists develop plans for psychological services appropriate to the problems presented by the users.

ILLUSTRATIVE STATEMENT: Ideally, a plan for intervention or consultation is in written form and serves as a basis for accountability. Regardless of the type of setting or users involved, a plan that describes the psychological services indicated and the manner in which they will be provided is developed and agreed upon by the providers and users.²²

2.3.3 There is a mutually acceptable understanding between a provider and a user or that user's responsible agent regarding the delivery of service.

ILLUSTRATIVE STATEMENT: A psychologist discusses the plan for provision of psychological services with the user, noting procedures that will be used and respective responsibilities of provider and user. This interaction is repeated whenever major changes occur in the plan for service. This understanding may be oral or written, but in any event, the psychologist documents the nature of the understanding.²³

2.3.5 Accurate, current, and pertinent records of essential psychological services are maintained.

ILLUSTRATIVE STATEMENT: At a minimum, records kept of psychological services should include identifying data, dates of services, and

²¹ ALASKA ADMIN. CODE tit. 12, § 60.185(b).

²² APA General Guidelines, *supra* note 11, at 6.

²³ *Id.*

types of services, and where appropriate, may include a record of significant actions taken. Providers make all reasonable efforts to record essential information concerning psychological services within a reasonable time of their completion.²⁴

Maintenance and Security of Records

Under APA Code of Ethics Standard 4.01 - Maintaining Confidentiality,²⁵ “[p]sychologists have a primary obligation and take reasonable precautions to protect confidential information obtained through or stored in any medium, recognizing that the extent and limits of confidentiality may be regulated by law or established by institutional rules or professional or scientific relationship.” (See also Standard [2.05, Delegation of Work to Others.](#))

Alaska also has delineated specific confidentiality standards:

Confidentiality of communication.²⁶

(a) A psychologist or psychological associate may not reveal to another person a communication made to the psychologist or psychological associate by a client about a matter concerning which the client has employed the psychologist or psychological associate in a professional capacity. This section does not apply to

- (1) a case conference with other mental health professionals or with physicians and surgeons;
- (2) a case in which the client in writing authorized the psychologist or psychological associate to reveal a communication;
- (3) a case where an immediate threat of serious physical harm to an identifiable victim is communicated to a psychologist or psychological associate by a client;
- (4) disclosures of confidential communications required under Rule 504, Alaska Rules of Evidence; or
- (5) proceedings conducted by the board or the department where the disclosure of confidential communications is necessary to defend against charges that the psychologist or psychological associate has violated provisions of this chapter; information obtained by the board or department under this paragraph is

²⁴ *Id.*

²⁵ APA CODE OF ETHICS, *supra* note 10.

²⁶ ALASKA STAT. § 08.86.200.

confidential and is not a public record for purposes of AS 40.25.110 – 40.25.140.

(b) Notwithstanding (a) of this section, a psychologist or psychological associate shall report to the appropriate authority incidents of child abuse or neglect as required by AS 47.17.020, incidents of abuse of a vulnerable adult as required by AS 47.24.010, and incidents of abuse of disabled persons disclosed to the psychologist or psychological associate by a client. In this subsection “disabled person” means a person who has a physical or mental disability or a physical or mental impairment, as defined in AS 18.80.300.

Standard 4.01 and the Alaska law support the record keeping standards:

6. Record Keeping and Fees²⁷

6.01 Documentation of Professional ...Maintenance of Records

Psychologists create, and to the extent the records are under their control, maintain, disseminate, store, retain and dispose of records and data relating to their professional and scientific work in order to (1) facilitate provision of services later by them or by other professionals, (2) allow for replication of research design and analyses, (3) meet institutional requirements, (4) ensure accuracy of billing and payments, and (5) ensure compliance with law. (See also Standard [4.01, Maintaining Confidentiality](#).)

HIPAA enables the patient to inspect and obtain Protected Health Information (PHI) records, including the Psychotherapy Notes created by the psychologist, as long as those records are maintained.²⁸ In addition, patients have a right to amend any part of the record;²⁹ Under this section, a denial of the proposed amendment can occur if the record was not created by the psychologist (unless the patient provides a reasonable basis to believe that the originator of PHI is no longer available to act on the requested amendment) or if the record is accurate and complete (other subsections are not discussed as they are unlikely to arise for psychologists). Finally, patients may obtain an accounting as to who has accessed the PHI and the details about each disclosure.³⁰

²⁷ APA CODE OF ETHICS, *supra* note 10.

²⁸ 45 CFR 164.524.

²⁹ 45 CFR 164.526 (a).

³⁰ 45 CFR 164.528.

6.02 Maintenance, Dissemination, and Disposal of Confidential Records of Professional...³¹

(a) Psychologists maintain confidentiality in creating, storing, accessing, transferring, and disposing of records under their control, whether these are written, automated, or in any other medium. (See also Standards [4.01, Maintaining Confidentiality](#), and [6.01, Documentation of Professional and Scientific Work and Maintenance of Records](#).)

(b) If confidential information concerning recipients of psychological services is entered into databases or systems of records available to persons whose access has not been consented to by the recipient, psychologists use coding or other techniques to avoid the inclusion of personal identifiers.

(c) Psychologists make plans in advance to facilitate the appropriate transfer and to protect the confidentiality of records and data in the event of psychologists' withdrawal from positions or practice. (See also Standards [3.12, Interruption of Psychological Services](#), and [10.09, Interruption of Therapy](#).)

Additionally, APA Code of Ethics Standard 6.02(b) requires the use coding or other techniques to avoid the inclusion of personal identifiers when confidential patient information is entered into databases or systems of records that are available to persons whose access has not been consented to by the patient.³²

HIPAA establishes privacy protections for all transmissions of PHI records, and requires specific patient authorizations (with a right of revocation) to transfer PHI records to third parties.³³ Concrete security standards are established for all electronic healthcare information (45 CFR 160).

6.03 Withholding Records for Nonpayment³⁴

Psychologists may not withhold records under their control that are requested and needed for a client's/patient's emergency treatment solely because payment has not been received.

³¹ APA CODE OF ETHICS, *supra* note 10.

³² *Id.*

³³ 45 CFR 164.508.

³⁴ APA CODE OF ETHICS, *supra* note 10.

Release and transfer of PHI records cannot be conditioned on payment or other conditions (such as enrollment in the health plan that employs the psychologist).³⁵

Retention of Records

Although no Alaska requirement exists, HIPAA³⁶ mandates that a covered entity must retain the documentation ...for six years from the date of its creation or the date when it last was in effect, whichever is later.

Violations of the specific duty

Alaska adopted the APA Code of Ethics and General Guidelines into its Administrative Code and the standards guidelines discussed, including HIPAA infractions, can all lead to disciplinary actions being prosecuted by the Alaska Board of Psychologist and Psychological Associate Examiners.³⁷

Grounds for imposition of disciplinary sanctions.

- (a) After a hearing, the board may impose a disciplinary sanction on a person licensed under this chapter when the board finds that the licensee
- ... (2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;
 - ... (5) intentionally or negligently engaged in or permitted the performance of patient care by persons under the licensee's supervision that does not conform to minimum professional standards regardless of whether actual injury to the patient occurred;
 - (6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;
- (b) The board may summarily suspend the license of a licensee who refuses to submit to a physical or mental examination under AS 08.86.075. A person whose license is suspended under this subsection is entitled to a hearing by the board within seven days after the effective date of the order. If, after a hearing, the board upholds the suspension, the licensee may appeal the suspension to a court of competent jurisdiction.

Penalty.³⁸ A person who violates this chapter is guilty of a class B misdemeanor.

³⁵ 45 CFR 164.508 (b)(4).

³⁶ 45 CFR 164.530 (j)(2).

³⁷ ALASKA STAT. § 08.86.204.

³⁸ ALASKA STAT. § 08.86.210.

Limits or conditions on license; discipline.³⁹

(a) Upon a finding that by reason of demonstrated problems of competence, experience, education, or health the authority to practice psychology or as a psychological associate under this chapter should be limited or conditioned or the practitioner disciplined, the board may reprimand, censure, place on probation, restrict practice by time, specialty, procedure or facility, require additional education or training, or revoke or suspend a license.

³⁹ ALASKA STAT. § 08.86.220.

AMENDMENTS TO THE 2002 "ETHICAL PRINCIPLES OF PSYCHOLOGISTS AND CODE OF CONDUCT" IN 2010 AND 2016

INTRODUCTION AND APPLICABILITY

The American Psychological Association's (APA's) Ethical Principles of Psychologists and Code of Conduct (hereinafter referred to as the Ethics Code) consists of an Introduction, a Preamble, five General Principles (A-E), and specific Ethical Standards. The Introduction discusses the intent, organization, procedural considerations, and scope of application of the Ethics Code. The Preamble and General Principles are aspirational goals to guide psychologists toward the highest ideals of psychology. Although the Preamble and General Principles are not themselves enforceable rules, they should be considered by psychologists in arriving at an ethical course of action. The Ethical Standards set forth enforceable rules for conduct as psychologists. Most of the Ethical Standards are written broadly, in order to apply to psychologists in varied roles, although the application of an Ethical Standard may vary depending on the context. The Ethical Standards are not exhaustive. The fact that a given conduct is not specifically addressed by an Ethical Standard does not mean that it is necessarily either ethical or unethical.

This Ethics Code applies only to psychologists' activities that are part of their scientific, educational, or professional roles as psychologists. Areas covered include but are not limited to the clinical, counseling, and school practice of psychology; research; teaching; supervision of trainees; public service; policy development; social intervention; development of assessment instruments; conducting assessments; educational counseling; organizational consulting; forensic activities; program design and evaluation; and administration. This Ethics Code applies to these activities across a variety of contexts, such as in person, postal, telephone, Internet, and other electronic transmissions. These activities shall be distinguished from the purely private conduct of psychologists, which is not within the purview of the Ethics Code.

Membership in the APA commits members and student affiliates to comply with the standards of the APA Ethics Code and to the rules and procedures used to enforce them. Lack of awareness or misunderstanding of an Ethical Standard is not itself a defense to a charge of unethical conduct.

The procedures for filing, investigating, and resolving complaints of unethical conduct are described in the current Rules and Procedures of the APA Ethics Committee. APA may impose sanctions on its members for violations of the standards of the Ethics Code, including termination of APA membership, and may notify other bodies and individuals of its actions. Actions that violate the standards of the Ethics Code may also lead to the imposition of sanctions on psychologists or students whether or not they are APA members by bodies other than APA, including state psychological associations, other professional groups, psychology boards, other state or federal agencies, and payors for health services.

In addition, APA may take action against a member after his or her conviction of a felony, expulsion or suspension from an affiliated state psychological association, or suspension or loss of licensure. When the sanction to be imposed by APA is less than expulsion, the 2001 Rules and Procedures do not guarantee an opportunity for an in-person hearing, but generally provide that complaints will be resolved only on the basis of a submitted record.

The Ethics Code is intended to provide guidance for psychologists and standards of professional conduct that can be applied by the APA and by other bodies that choose to adopt them. The Ethics Code is not intended to be a basis of civil liability. Whether a psychologist has violated the Ethics Code standards does not by itself determine whether the psychologist is legally liable in a court action, whether a contract is enforceable, or whether other legal consequences occur.

The American Psychological Association's Council of Representatives adopted this version of the APA Ethics Code during its meeting on August 21, 2002. The Code became effective on June 1, 2003. The Council of Representatives amended this version of the Ethics Code on February 20, 2010, effective June 1, 2010, and on August 3, 2016, effective January 1, 2017. (see p. 16 of this pamphlet). Inquiries concerning the substance or interpretation of the APA Ethics Code should be addressed to the Office of Ethics, American Psychological Association, 750 First St. NE, Washington, DC 20002-4242. This Ethics Code and information regarding the Code can be found on the APA website, <http://www.apa.org/ethics>. The standards in this Ethics Code will be used to adjudicate complaints brought concerning alleged conduct occurring on or after the effective date. Complaints will be adjudicated on the basis of the version of the Ethics Code that was in effect at the time the conduct occurred.

The APA has previously published its Ethics Code, or amendments thereto, as follows:

Request copies of the APA's Ethical Principles of Psychologists and Code of Conduct from the APA Order Department, 750 First St. NE, Washington, DC 20002-4242, or phone (202) 336-5510.

The modifiers used in some of the standards of this Ethics Code (e.g., *reasonably*, *appropriate*, *potentially*) are included in the standards when they would (1) allow professional judgment on the part of psychologists, (2) eliminate injustice or inequality that would occur without the modifier, (3) ensure applicability across the broad range of activities conducted by psychologists, or (4) guard against a set of rigid rules that might be quickly outdated. As used in this Ethics Code, the term *reasonable* means the prevailing professional judgment of psychologists engaged in similar activities in similar circumstances, given the knowledge the psychologist had or should have had at the time.

In the process of making decisions regarding their professional behavior, psychologists must consider this Ethics Code in addition to applicable laws and psychology board regulations. In applying the Ethics Code to their professional work, psychologists may consider other materials and guidelines that have been adopted or endorsed by scientific and professional psychological organizations and the dictates of their own conscience, as well as consult with others within the field. If this Ethics Code establishes a higher standard of conduct than is required by law, psychologists must meet the higher ethical standard. If psychologists' ethical responsibilities conflict with law, regulations, or other governing legal authority, psychologists make known their commitment to this Ethics Code and take steps to resolve the conflict in a responsible manner in keeping with basic principles of human rights.

PREAMBLE

Psychologists are committed to increasing scientific and professional knowledge of behavior and people's understanding of themselves and others and to the use of such knowledge to improve the condition of individuals, organizations, and society. Psychologists respect and protect civil and human rights and the central importance of freedom of inquiry and expression in research, teaching, and publication. They strive to help the public in developing informed judgments and choices concerning human behavior. In doing so, they perform many roles, such as researcher, educator, diagnostician, therapist, supervisor, consultant, administrator, social interventionist, and expert witness. This Ethics Code provides a common set of principles and standards upon which psychologists build their professional and scientific work.

This Ethics Code is intended to provide specific standards to cover most situations encountered by psychologists. It has as its goals the welfare and protection of the individuals and groups with whom psychologists work and the education of members, students, and the public regarding ethical standards of the discipline.

The development of a dynamic set of ethical standards for psychologists' work-related conduct requires a

personal commitment and lifelong effort to act ethically; to encourage ethical behavior by students, supervisees, employees, and colleagues; and to consult with others concerning ethical problems.

GENERAL PRINCIPLES

This section consists of General Principles. General Principles, as opposed to Ethical Standards, are aspirational in nature. Their intent is to guide and inspire psychologists toward the very highest ethical ideals of the profession. General Principles, in contrast to Ethical Standards, do not represent obligations and should not form the basis for imposing sanctions. Relying upon General Principles for either of these reasons distorts both their meaning and purpose.

Principle A: Beneficence and Nonmaleficence

Psychologists strive to benefit those with whom they work and take care to do no harm. In their professional actions, psychologists seek to safeguard the welfare and rights of those with whom they interact professionally and other affected persons, and the welfare of animal subjects of research. When conflicts occur among psychologists' obligations or concerns, they attempt to resolve these conflicts in a responsible fashion that avoids or minimizes harm. Because psychologists' scientific and professional judgments and actions may affect the lives of others, they are alert to and guard against personal, financial, social, organizational, or political factors that might lead to misuse of their influence. Psychologists strive to be aware of the possible effect of their own physical and mental health on their ability to help those with whom they work.

Principle B: Fidelity and Responsibility

Psychologists establish relationships of trust with those with whom they work. They are aware of their professional and scientific responsibilities to society and to the specific communities in which they work. Psychologists uphold professional standards of conduct, clarify their professional roles and obligations, accept appropriate responsibility for their behavior, and seek to manage conflicts of interest that could lead to exploitation or harm. Psychologists consult with, refer to, or cooperate with other professionals and institutions to the extent needed to serve the best interests of those with whom they work. They are concerned about the ethical compliance of their colleagues' scientific and professional conduct. Psychologists strive to contribute a portion of their professional time for little or no compensation or personal advantage.

Principle C: Integrity

Psychologists seek to promote accuracy, honesty, and truthfulness in the science, teaching, and practice of

psychology. In these activities psychologists do not steal, cheat, or engage in fraud, subterfuge, or intentional misrepresentation of fact. Psychologists strive to keep their promises and to avoid unwise or unclear commitments. In situations in which deception may be ethically justifiable to maximize benefits and minimize harm, psychologists have a serious obligation to consider the need for, the possible consequences of, and their responsibility to correct any resulting mistrust or other harmful effects that arise from the use of such techniques.

Principle D: Justice

Psychologists recognize that fairness and justice entitle all persons to access to and benefit from the contributions of psychology and to equal quality in the processes, procedures, and services being conducted by psychologists. Psychologists exercise reasonable judgment and take precautions to ensure that their potential biases, the boundaries of their competence, and the limitations of their expertise do not lead to or condone unjust practices.

Principle E: Respect for People's Rights and Dignity

Psychologists respect the dignity and worth of all people, and the rights of individuals to privacy, confidentiality, and self-determination. Psychologists are aware that special safeguards may be necessary to protect the rights and welfare of persons or communities whose vulnerabilities impair autonomous decision making. Psychologists are aware of and respect cultural, individual, and role differences, including those based on age, gender, gender identity, race, ethnicity, culture, national origin, religion, sexual orientation, disability, language, and socioeconomic status, and consider these factors when working with members of such groups. Psychologists try to eliminate the effect on their work of biases based on those factors, and they do not knowingly participate in or condone activities of others based upon such prejudices.

ETHICAL STANDARDS

1. Resolving Ethical Issues

1.01 Misuse of Psychologists' Work

If psychologists learn of misuse or misrepresentation of their work, they take reasonable steps to correct or minimize the misuse or misrepresentation.

1.02 Conflicts Between Ethics and Law, Regulations, or Other Governing Legal Authority

If psychologists' ethical responsibilities conflict with law, regulations, or other governing legal authority, psychologists clarify the nature of the conflict, make known their commitment to the Ethics Code, and take reasonable

steps to resolve the conflict consistent with the General Principles and Ethical Standards of the Ethics Code. Under no circumstances may this standard be used to justify or defend violating human rights.

1.03 Conflicts Between Ethics and Organizational Demands

If the demands of an organization with which psychologists are affiliated or for whom they are working are in conflict with this Ethics Code, psychologists clarify the nature of the conflict, make known their commitment to the Ethics Code, and take reasonable steps to resolve the conflict consistent with the General Principles and Ethical Standards of the Ethics Code. Under no circumstances may this standard be used to justify or defend violating human rights.

1.04 Informal Resolution of Ethical Violations

When psychologists believe that there may have been an ethical violation by another psychologist, they attempt to resolve the issue by bringing it to the attention of that individual, if an informal resolution appears appropriate and the intervention does not violate any confidentiality rights that may be involved. (See also Standards 1.02, Conflicts Between Ethics and Law, Regulations, or Other Governing Legal Authority, and 1.03, Conflicts Between Ethics and Organizational Demands.)

1.05 Reporting Ethical Violations

If an apparent ethical violation has substantially harmed or is likely to substantially harm a person or organization and is not appropriate for informal resolution under Standard 1.04, Informal Resolution of Ethical Violations, or is not resolved properly in that fashion, psychologists take further action appropriate to the situation. Such action might include referral to state or national committees on professional ethics, to state licensing boards, or to the appropriate institutional authorities. This standard does not apply when an intervention would violate confidentiality rights or when psychologists have been retained to review the work of another psychologist whose professional conduct is in question. (See also Standard 1.02, Conflicts Between Ethics and Law, Regulations, or Other Governing Legal Authority.)

1.06 Cooperating with Ethics Committees

Psychologists cooperate in ethics investigations, proceedings, and resulting requirements of the APA or any affiliated state psychological association to which they belong. In doing so, they address any confidentiality issues. Failure to cooperate is itself an ethics violation. However, making a request for deferment of adjudication of an ethics complaint pending the outcome of litigation does not alone constitute noncooperation.

1.07 Improper Complaints

Psychologists do not file or encourage the filing of ethics complaints that are made with reckless disregard for or willful ignorance of facts that would disprove the allegation.

1.08 Unfair Discrimination Against Complainants and Respondents

Psychologists do not deny persons employment, advancement, admissions to academic or other programs, tenure, or promotion, based solely upon their having made or their being the subject of an ethics complaint. This does not preclude taking action based upon the outcome of such proceedings or considering other appropriate information.

2. Competence

2.01 Boundaries of Competence

(a) Psychologists provide services, teach, and conduct research with populations and in areas only within the boundaries of their competence, based on their education, training, supervised experience, consultation, study, or professional experience.

(b) Where scientific or professional knowledge in the discipline of psychology establishes that an understanding of factors associated with age, gender, gender identity, race, ethnicity, culture, national origin, religion, sexual orientation, disability, language, or socioeconomic status is essential for effective implementation of their services or research, psychologists have or obtain the training, experience, consultation, or supervision necessary to ensure the competence of their services, or they make appropriate referrals, except as provided in Standard 2.02, Providing Services in Emergencies.

(c) Psychologists planning to provide services, teach, or conduct research involving populations, areas, techniques, or technologies new to them undertake relevant education, training, supervised experience, consultation, or study.

(d) When psychologists are asked to provide services to individuals for whom appropriate mental health services are not available and for which psychologists have not obtained the competence necessary, psychologists with closely related prior training or experience may provide such services in order to ensure that services are not denied if they make a reasonable effort to obtain the competence required by using relevant research, training, consultation, or study.

(e) In those emerging areas in which generally recognized standards for preparatory training do not yet exist, psychologists nevertheless take reasonable steps to ensure the competence of their work and to protect clients/patients, students, supervisees, research participants, organizational clients, and others from harm.

(f) When assuming forensic roles, psychologists are

or become reasonably familiar with the judicial or administrative rules governing their roles.

2.02 Providing Services in Emergencies

In emergencies, when psychologists provide services to individuals for whom other mental health services are not available and for which psychologists have not obtained the necessary training, psychologists may provide such services in order to ensure that services are not denied. The services are discontinued as soon as the emergency has ended or appropriate services are available.

2.03 Maintaining Competence

Psychologists undertake ongoing efforts to develop and maintain their competence.

2.04 Bases for Scientific and Professional Judgments

Psychologists' work is based upon established scientific and professional knowledge of the discipline. (See also Standards 2.01e, Boundaries of Competence, and 10.01b, Informed Consent to Therapy.)

2.05 Delegation of Work to Others

Psychologists who delegate work to employees, supervisees, or research or teaching assistants or who use the services of others, such as interpreters, take reasonable steps to (1) avoid delegating such work to persons who have a multiple relationship with those being served that would likely lead to exploitation or loss of objectivity; (2) authorize only those responsibilities that such persons can be expected to perform competently on the basis of their education, training, or experience, either independently or with the level of supervision being provided; and (3) see that such persons perform these services competently. (See also Standards 2.02, Providing Services in Emergencies; 3.05, Multiple Relationships; 4.01, Maintaining Confidentiality; 9.01, Bases for Assessments; 9.02, Use of Assessments; 9.03, Informed Consent in Assessments; and 9.07, Assessment by Unqualified Persons.)

2.06 Personal Problems and Conflicts

(a) Psychologists refrain from initiating an activity when they know or should know that there is a substantial likelihood that their personal problems will prevent them from performing their work-related activities in a competent manner.

(b) When psychologists become aware of personal problems that may interfere with their performing work-related duties adequately, they take appropriate measures, such as obtaining professional consultation or assistance, and determine whether they should limit, suspend, or terminate their work-related duties. (See also Standard 10.10, Terminating Therapy.)

3. Human Relations

3.01 Unfair Discrimination

In their work-related activities, psychologists do not engage in unfair discrimination based on age, gender, gender identity, race, ethnicity, culture, national origin, religion, sexual orientation, disability, socioeconomic status, or any basis proscribed by law.

3.02 Sexual Harassment

Psychologists do not engage in sexual harassment. Sexual harassment is sexual solicitation, physical advances, or verbal or nonverbal conduct that is sexual in nature, that occurs in connection with the psychologist's activities or roles as a psychologist, and that either (1) is unwelcome, is offensive, or creates a hostile workplace or educational environment, and the psychologist knows or is told this or (2) is sufficiently severe or intense to be abusive to a reasonable person in the context. Sexual harassment can consist of a single intense or severe act or of multiple persistent or pervasive acts. (See also Standard 1.08, Unfair Discrimination Against Complainants and Respondents.)

3.03 Other Harassment

Psychologists do not knowingly engage in behavior that is harassing or demeaning to persons with whom they interact in their work based on factors such as those persons' age, gender, gender identity, race, ethnicity, culture, national origin, religion, sexual orientation, disability, language, or socioeconomic status.

3.04 Avoiding Harm

(a) Psychologists take reasonable steps to avoid harming their clients/patients, students, supervisees, research participants, organizational clients, and others with whom they work, and to minimize harm where it is foreseeable and unavoidable.

(b) Psychologists do not participate in, facilitate, assist, or otherwise engage in torture, defined as any act by which severe pain or suffering, whether physical or mental, is intentionally inflicted on a person, or in any other cruel, inhuman, or degrading behavior that violates 3.04a.

3.05 Multiple Relationships

(a) A multiple relationship occurs when a psychologist is in a professional role with a person and (1) at the same time is in another role with the same person, (2) at the same time is in a relationship with a person closely associated with or related to the person with whom the psychologist has the professional relationship, or (3) promises to enter into another relationship in the future with the person or a person closely associated with or related to the person.

A psychologist refrains from entering into a multiple relationship if the multiple relationship could reasonably be expected to impair the psychologist's objectivity, competence, or effectiveness in performing his or her functions as a psychologist, or otherwise risks exploitation or harm to the person with whom the professional relationship exists.

Multiple relationships that would not reasonably be expected to cause impairment or risk exploitation or harm are not unethical.

(b) If a psychologist finds that, due to unforeseen factors, a potentially harmful multiple relationship has arisen, the psychologist takes reasonable steps to resolve it with due regard for the best interests of the affected person and maximal compliance with the Ethics Code.

(c) When psychologists are required by law, institutional policy, or extraordinary circumstances to serve in more than one role in judicial or administrative proceedings, at the outset they clarify role expectations and the extent of confidentiality and thereafter as changes occur. (See also Standards 3.04, Avoiding Harm, and 3.07, Third-Party Requests for Services.)

3.06 Conflict of Interest

Psychologists refrain from taking on a professional role when personal, scientific, professional, legal, financial, or other interests or relationships could reasonably be expected to (1) impair their objectivity, competence, or effectiveness in performing their functions as psychologists or (2) expose the person or organization with whom the professional relationship exists to harm or exploitation.

3.07 Third-Party Requests for Services

When psychologists agree to provide services to a person or entity at the request of a third party, psychologists attempt to clarify at the outset of the service the nature of the relationship with all individuals or organizations involved. This clarification includes the role of the psychologist (e.g., therapist, consultant, diagnostician, or expert witness), an identification of who is the client, the probable uses of the services provided or the information obtained, and the fact that there may be limits to confidentiality. (See also Standards 3.05, Multiple relationships, and 4.02, Discussing the Limits of Confidentiality.)

3.08 Exploitative Relationships

Psychologists do not exploit persons over whom they have supervisory, evaluative or other authority such as clients/patients, students, supervisees, research participants, and employees. (See also Standards 3.05, Multiple Relationships; 6.04, Fees and Financial Arrangements; 6.05, Barter with Clients/Patients; 7.07, Sexual Relationships with Students and Supervisees; 10.05, Sexual Intima-

cies with Current Therapy Clients/Patients; 10.06, Sexual Intimacies with Relatives or Significant Others of Current Therapy Clients/Patients; 10.07, Therapy with Former Sexual Partners; and 10.08, Sexual Intimacies with Former Therapy Clients/Patients.)

3.09 Cooperation with Other Professionals

When indicated and professionally appropriate, psychologists cooperate with other professionals in order to serve their clients/patients effectively and appropriately. (See also Standard 4.05, Disclosures.)

3.10 Informed Consent

(a) When psychologists conduct research or provide assessment, therapy, counseling, or consulting services in person or via electronic transmission or other forms of communication, they obtain the informed consent of the individual or individuals using language that is reasonably understandable to that person or persons except when conducting such activities without consent is mandated by law or governmental regulation or as otherwise provided in this Ethics Code. (See also Standards 8.02, Informed Consent to Research; 9.03, Informed Consent in Assessments; and 10.01, Informed Consent to Therapy.)

(b) For persons who are legally incapable of giving informed consent, psychologists nevertheless (1) provide an appropriate explanation, (2) seek the individual's assent, (3) consider such persons' preferences and best interests, and (4) obtain appropriate permission from a legally authorized person, if such substitute consent is permitted or required by law. When consent by a legally authorized person is not permitted or required by law, psychologists take reasonable steps to protect the individual's rights and welfare.

(c) When psychological services are court ordered or otherwise mandated, psychologists inform the individual of the nature of the anticipated services, including whether the services are court ordered or mandated and any limits of confidentiality, before proceeding.

(d) Psychologists appropriately document written or oral consent, permission, and assent. (See also Standards 8.02, Informed Consent to Research; 9.03, Informed Consent in Assessments; and 10.01, Informed Consent to Therapy.)

3.11 Psychological Services Delivered to or Through Organizations

(a) Psychologists delivering services to or through organizations provide information beforehand to clients and when appropriate those directly affected by the services about (1) the nature and objectives of the services, (2) the intended recipients, (3) which of the individuals are clients, (4) the relationship the psychologist will have with each person and the organization, (5) the probable uses of services

provided and information obtained, (6) who will have access to the information, and (7) limits of confidentiality. As soon as feasible, they provide information about the results and conclusions of such services to appropriate persons.

(b) If psychologists will be precluded by law or by organizational roles from providing such information to particular individuals or groups, they so inform those individuals or groups at the outset of the service.

3.12 Interruption of Psychological Services

Unless otherwise covered by contract, psychologists make reasonable efforts to plan for facilitating services in the event that psychological services are interrupted by factors such as the psychologist's illness, death, unavailability, relocation, or retirement or by the client's/patient's relocation or financial limitations. (See also Standard 6.02c, Maintenance, Dissemination, and Disposal of Confidential Records of Professional and Scientific Work.)

4. Privacy and Confidentiality

4.01 Maintaining Confidentiality

Psychologists have a primary obligation and take reasonable precautions to protect confidential information obtained through or stored in any medium, recognizing that the extent and limits of confidentiality may be regulated by law or established by institutional rules or professional or scientific relationship. (See also Standard 2.05, Delegation of Work to Others.)

4.02 Discussing the Limits of Confidentiality

(a) Psychologists discuss with persons (including, to the extent feasible, persons who are legally incapable of giving informed consent and their legal representatives) and organizations with whom they establish a scientific or professional relationship (1) the relevant limits of confidentiality and (2) the foreseeable uses of the information generated through their psychological activities. (See also Standard 3.10, Informed Consent.)

(b) Unless it is not feasible or is contraindicated, the discussion of confidentiality occurs at the outset of the relationship and thereafter as new circumstances may warrant.

(c) Psychologists who offer services, products, or information via electronic transmission inform clients/patients of the risks to privacy and limits of confidentiality.

4.03 Recording

Before recording the voices or images of individuals to whom they provide services, psychologists obtain permission from all such persons or their legal representatives. (See also Standards 8.03, Informed Consent for Recording Voices and Images in Research; 8.05, Dispensing with Informed Consent for Research; and 8.07, Deception in Research.)

4.04 Minimizing Intrusions on Privacy

(a) Psychologists include in written and oral reports and consultations, only information germane to the purpose for which the communication is made.

(b) Psychologists discuss confidential information obtained in their work only for appropriate scientific or professional purposes and only with persons clearly concerned with such matters.

4.05 Disclosures

(a) Psychologists may disclose confidential information with the appropriate consent of the organizational client, the individual client/patient, or another legally authorized person on behalf of the client/patient unless prohibited by law.

(b) Psychologists disclose confidential information without the consent of the individual only as mandated by law, or where permitted by law for a valid purpose such as to (1) provide needed professional services; (2) obtain appropriate professional consultations; (3) protect the client/patient, psychologist, or others from harm; or (4) obtain payment for services from a client/patient, in which instance disclosure is limited to the minimum that is necessary to achieve the purpose. (See also Standard 6.04e, Fees and Financial Arrangements.)

4.06 Consultations

When consulting with colleagues, (1) psychologists do not disclose confidential information that reasonably could lead to the identification of a client/patient, research participant, or other person or organization with whom they have a confidential relationship unless they have obtained the prior consent of the person or organization or the disclosure cannot be avoided, and (2) they disclose information only to the extent necessary to achieve the purposes of the consultation. (See also Standard 4.01, Maintaining Confidentiality.)

4.07 Use of Confidential Information for Didactic or Other Purposes

Psychologists do not disclose in their writings, lectures, or other public media, confidential, personally identifiable information concerning their clients/patients, students, research participants, organizational clients, or other recipients of their services that they obtained during the course of their work, unless (1) they take reasonable steps to disguise the person or organization, (2) the person or organization has consented in writing, or (3) there is legal authorization for doing so.

5. Advertising and Other Public Statements

5.01 Avoidance of False or Deceptive Statements

(a) Public statements include but are not limited to paid or unpaid advertising, product endorsements, grant applications, licensing applications, other credentialing applications, brochures, printed matter, directory listings, personal resumes or curricula vitae, or comments for use in media such as print or electronic transmission, statements in legal proceedings, lectures and public oral presentations, and published materials. Psychologists do not knowingly make public statements that are false, deceptive, or fraudulent concerning their research, practice, or other work activities or those of persons or organizations with which they are affiliated.

(b) Psychologists do not make false, deceptive, or fraudulent statements concerning (1) their training, experience, or competence; (2) their academic degrees; (3) their credentials; (4) their institutional or association affiliations; (5) their services; (6) the scientific or clinical basis for, or results or degree of success of, their services; (7) their fees; or (8) their publications or research findings.

(c) Psychologists claim degrees as credentials for their health services only if those degrees (1) were earned from a regionally accredited educational institution or (2) were the basis for psychology licensure by the state in which they practice.

5.02 Statements by Others

(a) Psychologists who engage others to create or place public statements that promote their professional practice, products, or activities retain professional responsibility for such statements.

(b) Psychologists do not compensate employees of press, radio, television, or other communication media in return for publicity in a news item. (See also Standard 1.01, Misuse of Psychologists' Work.)

(c) A paid advertisement relating to psychologists' activities must be identified or clearly recognizable as such.

5.03 Descriptions of Workshops and Non-Degree-Granting Educational Programs

To the degree to which they exercise control, psychologists responsible for announcements, catalogs, brochures, or advertisements describing workshops, seminars, or other non-degree-granting educational programs ensure that they accurately describe the audience for which the program is intended, the educational objectives, the presenters, and the fees involved.

5.04 Media Presentations

When psychologists provide public advice or comment via print, Internet, or other electronic transmission,

they take precautions to ensure that statements (1) are based on their professional knowledge, training, or experience in accord with appropriate psychological literature and practice; (2) are otherwise consistent with this Ethics Code; and (3) do not indicate that a professional relationship has been established with the recipient. (See also Standard 2.04, Bases for Scientific and Professional Judgments.)

5.05 Testimonials

Psychologists do not solicit testimonials from current therapy clients/patients or other persons who because of their particular circumstances are vulnerable to undue influence.

5.06 In-Person Solicitation

Psychologists do not engage, directly or through agents, in uninvited in-person solicitation of business from actual or potential therapy clients/patients or other persons who because of their particular circumstances are vulnerable to undue influence. However, this prohibition does not preclude (1) attempting to implement appropriate collateral contacts for the purpose of benefiting an already engaged therapy client/patient or (2) providing disaster or community outreach services.

6. Record Keeping and Fees

6.01 Documentation of Professional and Scientific Work and Maintenance of Records

Psychologists create, and to the extent the records are under their control, maintain, disseminate, store, retain, and dispose of records and data relating to their professional and scientific work in order to (1) facilitate provision of services later by them or by other professionals, (2) allow for replication of research design and analyses, (3) meet institutional requirements, (4) ensure accuracy of billing and payments, and (5) ensure compliance with law. (See also Standard 4.01, Maintaining Confidentiality.)

6.02 Maintenance, Dissemination, and Disposal of Confidential Records of Professional and Scientific Work

(a) Psychologists maintain confidentiality in creating, storing, accessing, transferring, and disposing of records under their control, whether these are written, automated, or in any other medium. (See also Standards 4.01, Maintaining Confidentiality, and 6.01, Documentation of Professional and Scientific Work and Maintenance of Records.)

(b) If confidential information concerning recipients of psychological services is entered into databases or systems of records available to persons whose access has not been consented to by the recipient, psychologists use coding or other techniques to avoid the inclusion of personal identifiers.

(c) Psychologists make plans in advance to facilitate the appropriate transfer and to protect the confidentiality of records and data in the event of psychologists' withdrawal from positions or practice. (See also Standards 3.12, Interruption of Psychological Services, and 10.09, Interruption of Therapy.)

6.03 Withholding Records for Nonpayment

Psychologists may not withhold records under their control that are requested and needed for a client's/patient's emergency treatment solely because payment has not been received.

6.04 Fees and Financial Arrangements

(a) As early as is feasible in a professional or scientific relationship, psychologists and recipients of psychological services reach an agreement specifying compensation and billing arrangements.

(b) Psychologists' fee practices are consistent with law.

(c) Psychologists do not misrepresent their fees.

(d) If limitations to services can be anticipated because of limitations in financing, this is discussed with the recipient of services as early as is feasible. (See also Standards 10.09, Interruption of Therapy, and 10.10, Terminating Therapy.)

(e) If the recipient of services does not pay for services as agreed, and if psychologists intend to use collection agencies or legal measures to collect the fees, psychologists first inform the person that such measures will be taken and provide that person an opportunity to make prompt payment. (See also Standards 4.05, Disclosures; 6.03, Withholding Records for Nonpayment; and 10.01, Informed Consent to Therapy.)

6.05 Barter with Clients/Patients

Barter is the acceptance of goods, services, or other nonmonetary remuneration from clients/patients in return for psychological services. Psychologists may barter only if (1) it is not clinically contraindicated, and (2) the resulting arrangement is not exploitative. (See also Standards 3.05, Multiple Relationships, and 6.04, Fees and Financial Arrangements.)

6.06 Accuracy in Reports to Payors and Funding Sources

In their reports to payors for services or sources of research funding, psychologists take reasonable steps to ensure the accurate reporting of the nature of the service provided or research conducted, the fees, charges, or payments, and where applicable, the identity of the provider, the findings, and the diagnosis. (See also Standards 4.01, Maintaining Confidentiality; 4.04, Minimizing Intrusions on Privacy; and 4.05, Disclosures.)

6.07 Referrals and Fees

When psychologists pay, receive payment from, or divide fees with another professional, other than in an employer-employee relationship, the payment to each is based on the services provided (clinical, consultative, administrative, or other) and is not based on the referral itself. (See also Standard 3.09, Cooperation with Other Professionals.)

7. Education and Training

7.01 Design of Education and Training Programs

Psychologists responsible for education and training programs take reasonable steps to ensure that the programs are designed to provide the appropriate knowledge and proper experiences, and to meet the requirements for licensure, certification, or other goals for which claims are made by the program. (See also Standard 5.03, Descriptions of Workshops and Non-Degree-Granting Educational Programs.)

7.02 Descriptions of Education and Training Programs

Psychologists responsible for education and training programs take reasonable steps to ensure that there is a current and accurate description of the program content (including participation in required course- or program-related counseling, psychotherapy, experiential groups, consulting projects, or community service), training goals and objectives, stipends and benefits, and requirements that must be met for satisfactory completion of the program. This information must be made readily available to all interested parties.

7.03 Accuracy in Teaching

(a) Psychologists take reasonable steps to ensure that course syllabi are accurate regarding the subject matter to be covered, bases for evaluating progress, and the nature of course experiences. This standard does not preclude an instructor from modifying course content or requirements when the instructor considers it pedagogically necessary or desirable, so long as students are made aware of these modifications in a manner that enables them to fulfill course requirements. (See also Standard 5.01, Avoidance of False or Deceptive Statements.)

(b) When engaged in teaching or training, psychologists present psychological information accurately. (See also Standard 2.03, Maintaining Competence.)

7.04 Student Disclosure of Personal Information

Psychologists do not require students or supervisees to disclose personal information in course- or program-related activities, either orally or in writing, regarding

sexual history, history of abuse and neglect, psychological treatment, and relationships with parents, peers, and spouses or significant others except if (1) the program or training facility has clearly identified this requirement in its admissions and program materials or (2) the information is necessary to evaluate or obtain assistance for students whose personal problems could reasonably be judged to be preventing them from performing their training- or professionally related activities in a competent manner or posing a threat to the students or others.

7.05 Mandatory Individual or Group Therapy

(a) When individual or group therapy is a program or course requirement, psychologists responsible for that program allow students in undergraduate and graduate programs the option of selecting such therapy from practitioners unaffiliated with the program. (See also Standard 7.02, Descriptions of Education and Training Programs.)

(b) Faculty who are or are likely to be responsible for evaluating students' academic performance do not themselves provide that therapy. (See also Standard 3.05, Multiple Relationships.)

7.06 Assessing Student and Supervisee Performance

(a) In academic and supervisory relationships, psychologists establish a timely and specific process for providing feedback to students and supervisees. Information regarding the process is provided to the student at the beginning of supervision.

(b) Psychologists evaluate students and supervisees on the basis of their actual performance on relevant and established program requirements.

7.07 Sexual Relationships with Students and Supervisees

Psychologists do not engage in sexual relationships with students or supervisees who are in their department, agency, or training center or over whom psychologists have or are likely to have evaluative authority. (See also Standard 3.05, Multiple Relationships.)

8. Research and Publication

8.01 Institutional Approval

When institutional approval is required, psychologists provide accurate information about their research proposals and obtain approval prior to conducting the research. They conduct the research in accordance with the approved research protocol.

8.02 Informed Consent to Research

(a) When obtaining informed consent as required in Standard 3.10, Informed Consent, psychologists inform participants about (1) the purpose of the research, expect-

ed duration, and procedures; (2) their right to decline to participate and to withdraw from the research once participation has begun; (3) the foreseeable consequences of declining or withdrawing; (4) reasonably foreseeable factors that may be expected to influence their willingness to participate such as potential risks, discomfort, or adverse effects; (5) any prospective research benefits; (6) limits of confidentiality; (7) incentives for participation; and (8) whom to contact for questions about the research and research participants' rights. They provide opportunity for the prospective participants to ask questions and receive answers. (See also Standards 8.03, Informed Consent for Recording Voices and Images in Research; 8.05, Dispensing with Informed Consent for Research; and 8.07, Deception in Research.)

(b) Psychologists conducting intervention research involving the use of experimental treatments clarify to participants at the outset of the research (1) the experimental nature of the treatment; (2) the services that will or will not be available to the control group(s) if appropriate; (3) the means by which assignment to treatment and control groups will be made; (4) available treatment alternatives if an individual does not wish to participate in the research or wishes to withdraw once a study has begun; and (5) compensation for or monetary costs of participating including, if appropriate, whether reimbursement from the participant or a third-party payor will be sought. (See also Standard 8.02a, Informed Consent to Research.)

8.03 Informed Consent for Recording Voices and Images in Research

Psychologists obtain informed consent from research participants prior to recording their voices or images for data collection unless (1) the research consists solely of naturalistic observations in public places, and it is not anticipated that the recording will be used in a manner that could cause personal identification or harm, or (2) the research design includes deception, and consent for the use of the recording is obtained during debriefing. (See also Standard 8.07, Deception in Research.)

8.04 Client/Patient, Student, and Subordinate Research Participants

(a) When psychologists conduct research with clients/patients, students, or subordinates as participants, psychologists take steps to protect the prospective participants from adverse consequences of declining or withdrawing from participation.

(b) When research participation is a course requirement or an opportunity for extra credit, the prospective participant is given the choice of equitable alternative activities.

8.05 Dispensing with Informed Consent for Research

Psychologists may dispense with informed consent only (1) where research would not reasonably be assumed to create distress or harm and involves (a) the study of normal educational practices, curricula, or classroom management methods conducted in educational settings; (b) only anonymous questionnaires, naturalistic observations, or archival research for which disclosure of responses would not place participants at risk of criminal or civil liability or damage their financial standing, employability, or reputation, and confidentiality is protected; or (c) the study of factors related to job or organization effectiveness conducted in organizational settings for which there is no risk to participants' employability, and confidentiality is protected or (2) where otherwise permitted by law or federal or institutional regulations.

8.06 Offering Inducements for Research Participation

(a) Psychologists make reasonable efforts to avoid offering excessive or inappropriate financial or other inducements for research participation when such inducements are likely to coerce participation.

(b) When offering professional services as an inducement for research participation, psychologists clarify the nature of the services, as well as the risks, obligations, and limitations. (See also Standard 6.05, Barter with Clients/Patients.)

8.07 Deception in Research

(a) Psychologists do not conduct a study involving deception unless they have determined that the use of deceptive techniques is justified by the study's significant prospective scientific, educational, or applied value and that effective nondeceptive alternative procedures are not feasible.

(b) Psychologists do not deceive prospective participants about research that is reasonably expected to cause physical pain or severe emotional distress.

(c) Psychologists explain any deception that is an integral feature of the design and conduct of an experiment to participants as early as is feasible, preferably at the conclusion of their participation, but no later than at the conclusion of the data collection, and permit participants to withdraw their data. (See also Standard 8.08, Debriefing.)

8.08 Debriefing

(a) Psychologists provide a prompt opportunity for participants to obtain appropriate information about the nature, results, and conclusions of the research, and they take reasonable steps to correct any misconceptions that participants may have of which the psychologists are aware.

(b) If scientific or humane values justify delaying or withholding this information, psychologists take reasonable measures to reduce the risk of harm.

(c) When psychologists become aware that research procedures have harmed a participant, they take reasonable steps to minimize the harm.

8.09 Humane Care and Use of Animals in Research

(a) Psychologists acquire, care for, use, and dispose of animals in compliance with current federal, state, and local laws and regulations, and with professional standards.

(b) Psychologists trained in research methods and experienced in the care of laboratory animals supervise all procedures involving animals and are responsible for ensuring appropriate consideration of their comfort, health, and humane treatment.

(c) Psychologists ensure that all individuals under their supervision who are using animals have received instruction in research methods and in the care, maintenance, and handling of the species being used, to the extent appropriate to their role. (See also Standard 2.05, Delegation of Work to Others.)

(d) Psychologists make reasonable efforts to minimize the discomfort, infection, illness, and pain of animal subjects.

(e) Psychologists use a procedure subjecting animals to pain, stress, or privation only when an alternative procedure is unavailable and the goal is justified by its prospective scientific, educational, or applied value.

(f) Psychologists perform surgical procedures under appropriate anesthesia and follow techniques to avoid infection and minimize pain during and after surgery.

(g) When it is appropriate that an animal's life be terminated, psychologists proceed rapidly, with an effort to minimize pain and in accordance with accepted procedures.

8.10 Reporting Research Results

(a) Psychologists do not fabricate data. (See also Standard 5.01a, Avoidance of False or Deceptive Statements.)

(b) If psychologists discover significant errors in their published data, they take reasonable steps to correct such errors in a correction, retraction, erratum, or other appropriate publication means.

8.11 Plagiarism

Psychologists do not present portions of another's work or data as their own, even if the other work or data source is cited occasionally.

8.12 Publication Credit

(a) Psychologists take responsibility and credit, in-

cluding authorship credit, only for work they have actually performed or to which they have substantially contributed. (See also Standard 8.12b, Publication Credit.)

(b) Principal authorship and other publication credits accurately reflect the relative scientific or professional contributions of the individuals involved, regardless of their relative status. Mere possession of an institutional position, such as department chair, does not justify authorship credit. Minor contributions to the research or to the writing for publications are acknowledged appropriately, such as in footnotes or in an introductory statement.

(c) Except under exceptional circumstances, a student is listed as principal author on any multiple-authored article that is substantially based on the student's doctoral dissertation. Faculty advisors discuss publication credit with students as early as feasible and throughout the research and publication process as appropriate. (See also Standard 8.12b, Publication Credit.)

8.13 Duplicate Publication of Data

Psychologists do not publish, as original data, data that have been previously published. This does not preclude republishing data when they are accompanied by proper acknowledgment.

8.14 Sharing Research Data for Verification

(a) After research results are published, psychologists do not withhold the data on which their conclusions are based from other competent professionals who seek to verify the substantive claims through reanalysis and who intend to use such data only for that purpose, provided that the confidentiality of the participants can be protected and unless legal rights concerning proprietary data preclude their release. This does not preclude psychologists from requiring that such individuals or groups be responsible for costs associated with the provision of such information.

(b) Psychologists who request data from other psychologists to verify the substantive claims through reanalysis may use shared data only for the declared purpose. Requesting psychologists obtain prior written agreement for all other uses of the data.

8.15 Reviewers

Psychologists who review material submitted for presentation, publication, grant, or research proposal review respect the confidentiality of and the proprietary rights in such information of those who submitted it.

9. Assessment

9.01 Bases for Assessments

(a) Psychologists base the opinions contained in their recommendations, reports, and diagnostic or evaluative statements, including forensic testimony, on informa-

tion and techniques sufficient to substantiate their findings. (See also Standard 2.04, Bases for Scientific and Professional Judgments.)

(b) Except as noted in 9.01c, psychologists provide opinions of the psychological characteristics of individuals only after they have conducted an examination of the individuals adequate to support their statements or conclusions. When, despite reasonable efforts, such an examination is not practical, psychologists document the efforts they made and the result of those efforts, clarify the probable impact of their limited information on the reliability and validity of their opinions, and appropriately limit the nature and extent of their conclusions or recommendations. (See also Standards 2.01, Boundaries of Competence, and 9.06, Interpreting Assessment Results.)

(c) When psychologists conduct a record review or provide consultation or supervision and an individual examination is not warranted or necessary for the opinion, psychologists explain this and the sources of information on which they based their conclusions and recommendations.

9.02 Use of Assessments

(a) Psychologists administer, adapt, score, interpret, or use assessment techniques, interviews, tests, or instruments in a manner and for purposes that are appropriate in light of the research on or evidence of the usefulness and proper application of the techniques.

(b) Psychologists use assessment instruments whose validity and reliability have been established for use with members of the population tested. When such validity or reliability has not been established, psychologists describe the strengths and limitations of test results and interpretation.

(c) Psychologists use assessment methods that are appropriate to an individual's language preference and competence, unless the use of an alternative language is relevant to the assessment issues.

9.03 Informed Consent in Assessments

(a) Psychologists obtain informed consent for assessments, evaluations, or diagnostic services, as described in Standard 3.10, Informed Consent, except when (1) testing is mandated by law or governmental regulations; (2) informed consent is implied because testing is conducted as a routine educational, institutional, or organizational activity (e.g., when participants voluntarily agree to assessment when applying for a job); or (3) one purpose of the testing is to evaluate decisional capacity. Informed consent includes an explanation of the nature and purpose of the assessment, fees, involvement of third parties, and limits of confidentiality and sufficient opportunity for the client/patient to ask questions and receive answers.

(b) Psychologists inform persons with questionable

capacity to consent or for whom testing is mandated by law or governmental regulations about the nature and purpose of the proposed assessment services, using language that is reasonably understandable to the person being assessed.

(c) Psychologists using the services of an interpreter obtain informed consent from the client/patient to use that interpreter, ensure that confidentiality of test results and test security are maintained, and include in their recommendations, reports, and diagnostic or evaluative statements, including forensic testimony, discussion of any limitations on the data obtained. (See also Standards 2.05, Delegation of Work to Others; 4.01, Maintaining Confidentiality; 9.01, Bases for Assessments; 9.06, Interpreting Assessment Results; and 9.07, Assessment by Unqualified Persons.)

9.04 Release of Test Data

(a) The term *test data* refers to raw and scaled scores, client/patient responses to test questions or stimuli, and psychologists' notes and recordings concerning client/patient statements and behavior during an examination. Those portions of test materials that include client/patient responses are included in the definition of *test data*. Pursuant to a client/patient release, psychologists provide test data to the client/patient or other persons identified in the release. Psychologists may refrain from releasing test data to protect a client/patient or others from substantial harm or misuse or misrepresentation of the data or the test, recognizing that in many instances release of confidential information under these circumstances is regulated by law. (See also Standard 9.11, Maintaining Test Security.)

(b) In the absence of a client/patient release, psychologists provide test data only as required by law or court order.

9.05 Test Construction

Psychologists who develop tests and other assessment techniques use appropriate psychometric procedures and current scientific or professional knowledge for test design, standardization, validation, reduction or elimination of bias, and recommendations for use.

9.06 Interpreting Assessment Results

When interpreting assessment results, including automated interpretations, psychologists take into account the purpose of the assessment as well as the various test factors, test-taking abilities, and other characteristics of the person being assessed, such as situational, personal, linguistic, and cultural differences, that might affect psychologists' judgments or reduce the accuracy of their interpretations. They indicate any significant limitations of their interpretations. (See also Standards 2.01b and c, Boundaries of Competence, and 3.01, Unfair Discrimination.)

9.07 Assessment by Unqualified Persons

Psychologists do not promote the use of psychological assessment techniques by unqualified persons, except when such use is conducted for training purposes with appropriate supervision. (See also Standard 2.05, Delegation of Work to Others.)

9.08 Obsolete Tests and Outdated Test Results

(a) Psychologists do not base their assessment or intervention decisions or recommendations on data or test results that are outdated for the current purpose.

(b) Psychologists do not base such decisions or recommendations on tests and measures that are obsolete and not useful for the current purpose.

9.09 Test Scoring and Interpretation Services

(a) Psychologists who offer assessment or scoring services to other professionals accurately describe the purpose, norms, validity, reliability, and applications of the procedures and any special qualifications applicable to their use.

(b) Psychologists select scoring and interpretation services (including automated services) on the basis of evidence of the validity of the program and procedures as well as on other appropriate considerations. (See also Standard 2.01b and c, Boundaries of Competence.)

(c) Psychologists retain responsibility for the appropriate application, interpretation, and use of assessment instruments, whether they score and interpret such tests themselves or use automated or other services.

9.10 Explaining Assessment Results

Regardless of whether the scoring and interpretation are done by psychologists, by employees or assistants, or by automated or other outside services, psychologists take reasonable steps to ensure that explanations of results are given to the individual or designated representative unless the nature of the relationship precludes provision of an explanation of results (such as in some organizational consulting, preemployment or security screenings, and forensic evaluations), and this fact has been clearly explained to the person being assessed in advance.

9.11 Maintaining Test Security

The term *test materials* refers to manuals, instruments, protocols, and test questions or stimuli and does not include *test data* as defined in Standard 9.04, Release of Test Data. Psychologists make reasonable efforts to maintain the integrity and security of test materials and other assessment techniques consistent with law and contractual obligations, and in a manner that permits adherence to this Ethics Code.

10. Therapy

10.01 Informed Consent to Therapy

(a) When obtaining informed consent to therapy as required in Standard 3.10, Informed Consent, psychologists inform clients/patients as early as is feasible in the therapeutic relationship about the nature and anticipated course of therapy, fees, involvement of third parties, and limits of confidentiality and provide sufficient opportunity for the client/patient to ask questions and receive answers. (See also Standards 4.02, Discussing the Limits of Confidentiality, and 6.04, Fees and Financial Arrangements.)

(b) When obtaining informed consent for treatment for which generally recognized techniques and procedures have not been established, psychologists inform their clients/patients of the developing nature of the treatment, the potential risks involved, alternative treatments that may be available, and the voluntary nature of their participation. (See also Standards 2.01e, Boundaries of Competence, and 3.10, Informed Consent.)

(c) When the therapist is a trainee and the legal responsibility for the treatment provided resides with the supervisor, the client/patient, as part of the informed consent procedure, is informed that the therapist is in training and is being supervised and is given the name of the supervisor.

10.02 Therapy Involving Couples or Families

(a) When psychologists agree to provide services to several persons who have a relationship (such as spouses, significant others, or parents and children), they take reasonable steps to clarify at the outset (1) which of the individuals are clients/patients and (2) the relationship the psychologist will have with each person. This clarification includes the psychologist's role and the probable uses of the services provided or the information obtained. (See also Standard 4.02, Discussing the Limits of Confidentiality.)

(b) If it becomes apparent that psychologists may be called on to perform potentially conflicting roles (such as family therapist and then witness for one party in divorce proceedings), psychologists take reasonable steps to clarify and modify, or withdraw from, roles appropriately. (See also Standard 3.05c, Multiple Relationships.)

10.03 Group Therapy

When psychologists provide services to several persons in a group setting, they describe at the outset the roles and responsibilities of all parties and the limits of confidentiality.

10.04 Providing Therapy to Those Served by Others

In deciding whether to offer or provide services to those already receiving mental health services elsewhere, psychologists carefully consider the treatment issues and the potential client's/patient's welfare. Psychologists discuss these issues with the client/patient or another legally authorized person on behalf of the client/patient in order to minimize the risk of confusion and conflict, consult with the other service providers when appropriate, and proceed with caution and sensitivity to the therapeutic issues.

10.05 Sexual Intimacies with Current Therapy Clients/Patients

Psychologists do not engage in sexual intimacies with current therapy clients/patients.

10.06 Sexual Intimacies with Relatives or Significant Others of Current Therapy Clients/Patients

Psychologists do not engage in sexual intimacies with individuals they know to be close relatives, guardians, or significant others of current clients/patients. Psychologists do not terminate therapy to circumvent this standard.

10.07 Therapy with Former Sexual Partners

Psychologists do not accept as therapy clients/patients persons with whom they have engaged in sexual intimacies.

10.08 Sexual Intimacies with Former Therapy Clients/Patients

(a) Psychologists do not engage in sexual intimacies with former clients/patients for at least two years after cessation or termination of therapy.

(b) Psychologists do not engage in sexual intimacies with former clients/patients even after a two-year interval except in the most unusual circumstances. Psychologists who engage in such activity after the two years following cessation or termination of therapy and of having no sexual contact with the former client/patient bear the burden of demonstrating that there has been no exploitation, in light of all relevant factors, including (1) the amount of time that has passed since therapy terminated; (2) the nature, duration, and intensity of the therapy; (3) the circumstances of termination; (4) the client's/patient's personal history; (5) the client's/patient's current mental status; (6) the likelihood of adverse impact on the client/patient; and (7) any statements or actions made by the therapist during the course of therapy suggesting or inviting the possibility of a posttermination sexual or romantic relationship with the client/patient. (See also Standard 3.05, Multiple Relationships.)

10.09 Interruption of Therapy

When entering into employment or contractual relationships, psychologists make reasonable efforts to provide for orderly and appropriate resolution of responsibility for client/patient care in the event that the employment or contractual relationship ends, with paramount consideration given to the welfare of the client/patient. (See also Standard 3.12, Interruption of Psychological Services.)

10.10 Terminating Therapy

(a) Psychologists terminate therapy when it becomes reasonably clear that the client/patient no longer needs the service, is not likely to benefit, or is being harmed by continued service.

(b) Psychologists may terminate therapy when threatened or otherwise endangered by the client/patient or another person with whom the client/patient has a relationship.

(c) Except where precluded by the actions of clients/patients or third-party payors, prior to termination psychologists provide pretermination counseling and suggest alternative service providers as appropriate.

AMENDMENTS TO THE 2002 “ETHICAL PRINCIPLES OF PSYCHOLOGISTS AND CODE OF CONDUCT” IN 2010 AND 2016

2010 Amendments

Introduction and Applicability

If psychologists’ ethical responsibilities conflict with law, regulations, or other governing legal authority, psychologists make known their commitment to this Ethics Code and take steps to resolve the conflict in a responsible manner. ~~If the conflict is unresolvable via such means, psychologists may adhere to the requirements of the law, regulations, or other governing authority in keeping with basic principles of human rights.~~

1.02 Conflicts Between Ethics and Law, Regulations, or Other Governing Legal Authority

If psychologists’ ethical responsibilities conflict with law, regulations, or other governing legal authority, psychologists clarify the nature of the conflict, make known their commitment to the Ethics Code, and take reasonable steps to resolve the conflict consistent with the General Principles and Ethical Standards of the Ethics Code. ~~If the conflict is unresolvable via such means, psychologists may adhere to the requirements of the law, regulations, or other governing legal authority, Under no circumstances may this standard be used to justify or defend violating human rights.~~

1.03 Conflicts Between Ethics and Organizational Demands

If the demands of an organization with which psychologists are affiliated or for whom they are working are in conflict with this Ethics Code, psychologists clarify the nature of the conflict, make known their commitment to the Ethics Code, and to the extent feasible, resolve the conflict in a way that permits adherence to the Ethics Code; take reasonable steps to resolve the conflict consistent with the General Principles and Ethical Standards of the Ethics Code. Under no circumstances may this standard be used to justify or defend violating human rights.

2016 Amendment

3.04 Avoiding Harm

(a) Psychologists take reasonable steps to avoid harming their clients/patients, students, supervisees, research participants, organizational clients, and others with whom they work, and to minimize harm where it is foreseeable and unavoidable.

(b) Psychologists do not participate in, facilitate, assist, or otherwise engage in torture, defined as any act by which severe pain or suffering, whether physical or mental, is intentionally inflicted on a person, or in any other cruel, inhuman, or degrading behavior that violates 3.04a.

ACKNOWLEDGMENT

I acknowledge that I have received and reviewed the policies and relevant documents of the Alaska Psychology Internship Consortium:

1. Nondiscrimination Policy
2. Administrative & Financial Assistance
3. Requirements for Successful Internship Performance
4. Supervision Requirements
5. Intern Performance Evaluation, Feedback, Retention, and Termination Decisions
6. Intern Recruitment and Selection Policy
7. Grievance Policy
8. Due Process Policy
9. Maintenance of Records
10. Didactics Attendance Policy
11. Dissertation Policy
12. Publication Policy
13. Duty to Record Ethical, Legal, and Professional Considerations for AK Psychologists
14. APA Ethical Principles of Psychologists and Code of Conduct

I have been provided with a copy of the documents to keep in my files.

EVALUATIONS

www.ak-pic.org

Aleutian Pribilof Islands Association | Alaska Psychiatric Institute
Providence Family Medicine Center/Alaska Family Medicine Residency

AK-PIC Intern Self-Evaluation

General Information

Background Information: The AK-PIC Intern Self-Evaluation is completed by each intern at the beginning, mid-point and end of the training year.

Evaluators: AK-PIC has partnered with Clover Educational Consulting Group (Clover) to collect and maintain our evaluation data. Data collection is being conducted by Dr. Erin Foley and Dr. Christine Love Sterk at Clover, in partnership with AK-PIC. If you have any questions or concerns regarding this evaluation survey, please email Dr. Foley and Dr. Love Sterk at accreditation.support@clovered.org.

What you will be asked to do: In this survey, you are asked to rate your functioning in each of the profession wide competencies. Following each broad competency area, you will find a comment box. Please use this comment box to provide information on your rating. In assessing your current level of achievement in each competency area, please consider the professional wide competencies and associated learning elements information located in your intern handbook as a guide.

Confidentiality: Survey responses will be sent to the Training Director(s) and your supervisor(s) so that the information can be incorporated into your training plan.

Intern Name:

Supervisor Name:

AK-PIC Site:

Please indicate which self-evaluation this is:

Instructions

For each profession-wide competency please enter a score using the Scoring Criteria below. Additionally, in the comments section for each competency area, please provide the following:

- For the Initial Self-Evaluation, please note any strengths you already have as well as up to three (minimum of one) specific training goals related to the profession wide competency.
- For the Mid-Year and Final Self-Evaluations, please describe progress toward your goals and/or list any newly identified goal(s).

1	Functioning below the minimal level expected during internship. Substantial supervision required on all cases/projects; little to no autonomous judgment. Poor clinical judgment and/or safety concerns identified. Little to no confidence in ability to function independently.
2	At mid-point in the training year, this score indicates functioning at a lower than expected level based on intern's developmental training experience. Supervision required on most straightforward cases/projects and there are rising concerns about clinical judgment.
3	Functioning at a level consistent with developmental training experience. Regular supervision may be required on complex cases/projects and in new skill areas.

AK-PIC Intern Self-Evaluation

4	At end of year, this rating indicated functioning at a level consistent with entry-level practice. At mid-point, this rating indicates periodic supervision is required on challenging cases/projects and in new skill areas. Most cases/projects need consultation only.
5	Functioning at an autonomous level, with skill representing that expected beyond the level of internship training. Sound critical thinking/judgment. Some consultation may be needed in advanced or specialized area(s).

Profession Wide Competencies

1- Functioning below the minimal level expected during internship.	2- Functioning at lower level than expected based on intern's developmental training experience.	3- Functioning at a level consistent with developing competence (Typical rating at mid-point).	4- Functioning at a level consistent with entry-level practice (Expected rating at year end).	5- Functioning at autonomous level (Typical rating for postdoctoral level of functioning).

AK-PIC Intern Competency Evaluation

General Information

Background Information: The AK-PIC Intern Competency Evaluation is completed by supervisors at the mid-point and end of the training year.

Evaluators: AK-PIC has partnered with Clover Educational Consulting Group (Clover) to collect and maintain our evaluation data. Data collection is being conducted by Dr. Erin Foley and Dr. Christine Love Sterk at Clover, in partnership with AK-PIC. If you have any questions or concerns regarding this evaluation survey, please email Dr. Foley and Dr. Love Sterk at accreditation.support@clovered.org.

What you will be asked to do: In this survey, supervisors are asked to rate the intern's functioning on every item. At the end of each broad competency area, include 2-3 things the trainee is doing well and 2-3 things where they could improve, and elaborate on specific ratings as appropriate.

Confidentiality: Survey responses will be sent to the Training Director(s) and primary supervisor so that they may be reviewed with the intern.

Please indicate which competency evaluation this is.

Mid-year
Final

Please identify the methods used to evaluate intern competency (check all that apply).

- | | | |
|-------------------------|------------------------|-------------------------------------|
| • Direct observation | • Case presentation | • Supervision |
| • Review of audio/video | • Documentation review | • Comments from other staff/faculty |

Please review the scoring criteria before proceeding with the evaluation.

1	Functioning below the minimal level expected during internship. Substantial supervision required on all cases/projects. Intern demonstrates little to no autonomous judgment; poor clinical judgment and/or safety concerns are identified. Supervisor has little to no confidence in the intern's ability to function independently.
2	Functioning at a lower than expected level based on intern's developmental training experience. Supervision required on most straightforward cases/projects and there are rising concerns about intern's clinical judgment.
3	Functioning at a level consistent with developing competence. This level of functioning is typical for the midpoint of internship training. Regular supervision may be required on complex cases/projects and in new skill areas.
4	Functioning at a level consistent with entry-level practice at end of year. At mid-point, this rating

AK-PIC Intern Competency Evaluation

	indicates periodic supervision is required on challenging cases/projects and in new skill areas. Most cases/projects need consultation only.
5	Functioning at an autonomous level, with skill representing that expected beyond the consultation of internship training. Demonstrates sound critical thinking/judgment. Some consultation may be needed in advanced or specialized area(s).
Note: To successfully complete the internship, interns must obtain ratings of at least "4" {Ready for entry-level practice} for all competencies/items on the final evaluation. As described in AK-PIC policies, a rating of "2" or below on any learning element will trigger AK-PIC's formal Due Process Procedures.	

Research

1- Functioning below the minimal level expected during internship.	2- Functioning at lower level than expected based on intern's developmental training experience.	3- Functioning at a level consistent with developing competence (Typical rating at mid-point).	4- Functioning at a level consistent with entry-level practice (Expected rating at year end).	5- Functioning at autonomous level (Typical rating for postdoctoral level of functioning).
---	---	---	--	---

Demonstrates the substantially independent ability to critically evaluate and disseminate research or other scholarly activities (e.g., case conference, presentations, publications) at the local (including the host institution), regional, or national level.	
Demonstrates knowledge of and respect for scientific bases of behavior.	

Comments: (required)

Ethical and Legal Standards

1- Functioning below the minimal level expected during internship.	2- Functioning at lower level than expected based on intern's developmental training experience.	3- Functioning at a level consistent with developing competence (Typical rating at mid-point).	4- Functioning at a level consistent with entry-level practice (Expected rating at year end).	5- Functioning at autonomous level (Typical rating for postdoctoral level of functioning).
---	---	---	--	---

AK-PIC Intern Competency Evaluation

Knowledgeable of, demonstrates and acts in accordance with each of the following: 1. The current version of APA Ethical Principles of Psychologists and Code of Conduct; 2. Relevant laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional, and federal levels; and 3. Relevant professional standards and guidelines.	
Recognizes ethical dilemmas as they arise, and applies ethical decision-making processes in order to resolve the dilemmas.	
Conducts self in an ethical manner in all professional activities.	
Consults actively with supervisor to act upon ethical and legal aspects of practice.	

Comments: (required)

Individual and Cultural Diversity

1- Functioning below the minimal level expected during internship.	2- Functioning at lower level than expected based on intern's developmental training experience.	3- Functioning at a level consistent with developing competence (Typical rating at mid-point).	4- Functioning at a level consistent with entry-level practice (Expected rating at year end).	5- Functioning at autonomous level (Typical rating for postdoctoral level of functioning).
---	---	---	--	---

Demonstrates an understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves.	
Demonstrates knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/ consultation, and service.	
Demonstrates the ability to integrate awareness and knowledge of individual and cultural differences in the conduct of professional roles (e.g., research, services, and other professional activities). This includes the ability to apply a framework for working effectively with areas of individual and cultural diversity not previously encountered over the course of their careers. Also included is the ability to work effectively with individuals whose group membership, demographic characteristics, or worldviews create conflict with their own.	

AK-PIC Intern Competency Evaluation

Demonstrates the ability to independently apply their knowledge and approach in working effectively with the range of diverse individuals and groups encountered during internship.	
Initiates supervision regularly about diversity issues and integrates feedback into practice.	

Comments: (required)

Professional Values, Attitudes, and Behaviors

1- Functioning below the minimal level expected during internship.	2- Functioning at lower level than expected based on intern's developmental training experience.	3- Functioning at a level consistent with developing competence (Typical rating at mid-point).	4- Functioning at a level consistent with entry-level practice (Expected rating at year end).	5- Functioning at autonomous level (Typical rating for postdoctoral level of functioning).
---	---	---	--	---

Behaves in ways that reflect the values and attitudes of psychology, including cultural humility, integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others.	
Engages in self-reflection regarding one's personal and professional functioning; engages in activities to maintain and improve performance, well-being, and professional effectiveness.	
Actively seeks and demonstrates openness and responsiveness to feedback and supervision.	
Responds professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training.	
Accepts responsibility for meeting deadlines, completing required documentation promptly and accurately.	

Comments: (required)

AK-PIC Intern Competency Evaluation

Communication and Interpersonal Skills

1- Functioning below the minimal level expected during internship.	2- Functioning at lower level than expected based on intern's developmental training experience.	3- Functioning at a level consistent with developing competence (Typical rating at mid-point).	4- Functioning at a level consistent with entry-level practice (Expected rating at year end).	5- Functioning at autonomous level (Typical rating for postdoctoral level of functioning).
---	--	--	---	---

Develops and maintains effective relationships with a wide range of individuals, including colleagues, communities, organizations, supervisors, supervisees, and those receiving professional services.	
Demonstrates a thorough grasp of professional language and concepts; produces, comprehends, and engages in communications that are informative and well-integrated.	
Demonstrates effective interpersonal skills and the ability to manage difficult communication well.	
Demonstrates knowledge of and comfort with the technological systems necessary to provide distance delivery.	
Engages in social media activities in a manner that maintains professionalism and respect.	

Comments: (required)

internship.	developmental training experience.	(Typical rating at mid-point).	(Expected rating at year end).	of functioning).
-------------	---------------------------------------	-----------------------------------	-----------------------------------	------------------

Demonstrates current knowledge of diagnostic classification systems, functional and dysfunctional behaviors, including consideration of client strengths and psychopathology.	
Demonstrates understanding of human behavior within its context (e.g., family, social, societal and cultural).	
Demonstrates the ability to apply the knowledge of functional and dysfunctional behaviors including context to the assessment and/or diagnostic process.	
Selects and applies assessment methods that draw from the empirical literature and that reflect the science of measurement and psychometrics; collects relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment as well as relevant diversity characteristics of the service recipient.	
Interprets assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision- making biases, distinguishing the aspects of assessment that are subjective from those that are objective.	
Communicates findings and implications of the assessment in an accurate and effective manner sensitive to a range of audiences.	
Articulates relevant developmental features, clinical symptoms, and cultural factors as applied to presenting questions and findings (e.g., intergenerational trauma).	
Demonstrates ability to conduct a multi-diagnostic differential assessment for Substance Use/Co-occurring Disorders.	

Comments: (required)

Intervention

expected during internship.	intern's developmental training experience.	competence (Typical rating at mid-point).	practice (Expected rating at year end).	postdoctoral level of functioning).
-----------------------------	---	---	---	-------------------------------------

Establishes and maintains effective relationships with the recipients of psychological services.	
Develops evidence-based intervention plans specific to the service delivery goals.	
Implements interventions informed by the current scientific literature, assessment findings, diversity characteristics, and contextual variables.	
Demonstrates the ability to apply the relevant research literature to clinical decision making.	
Modifies and adapts evidence-based approaches effectively when a clear evidence-base is lacking.	
Evaluates intervention effectiveness and adapts intervention goals and methods consistent with ongoing evaluation.	
Demonstrates ability to apply specific evidence-based interventions (e.g., intergenerational trauma) for Substance Use/Co-occurring Disorders.	

Comments: (required)

Supervision

1- Functioning below the minimal level expected during internship.	2- Functioning at lower level than expected based on intern's developmental training experience.	3- Functioning at a level consistent with developing competence (Typical rating at mid-point).	4- Functioning at a level consistent with entry-level practice (Expected rating at year end).	5- Functioning at autonomous level (Typical rating for postdoctoral level of functioning).
---	---	---	--	---

Applies supervision knowledge in direct or simulated practice with psychology trainees, or other health professionals. Examples of direct or simulated practice include, but are not limited to, role-played supervision with others, and peer supervision with other trainees.	
---	--

AK-PIC Intern Competency Evaluation

Applies the supervisory skills of observing, evaluating, and giving guidance and feedback in direct or simulated practice.	
Demonstrates understanding of roles and responsibilities of the supervisor and supervisee in the supervision process.	
Provides feedback to peers regarding peers' clinical work in context of group supervision or case conference.	

Comments: (required)

Consultation and Interprofessional/Interdisciplinary Skills

1- Functioning below the minimal level expected during internship.	2- Functioning at lower level than expected based on intern's developmental training experience.	3- Functioning at a level consistent with developing competence (Typical rating at mid-point).	4- Functioning at a level consistent with entry-level practice (Expected rating at year end).	5- Functioning at autonomous level (Typical rating for postdoctoral level of functioning).
---	---	---	--	---

Demonstrates knowledge and respect for the roles and perspectives of other professions.	
Applies knowledge of consultation models and practices in direct or simulated consultation with individuals and their families, other health care professionals, interprofessional groups, or systems related to health and behavior.	

Comments: (required)

Please provide any additional comments/feedback you have regarding the intern's overall performance.

AK-PIC Supervisor Evaluation Survey

General Information

Background Information: This Supervisor Evaluation is used by the Alaska Psychology Internship Consortium (AK-PIC) to continually improve and enhance the training program. Your feedback is carefully considered. Any rating below "Meets Expectations" will result in corrective action as deemed appropriate by the Training Committee to improve the intern's supervisory experience. Please include detailed explanatory comments wherever possible to help us respond most effectively.

Evaluators: AK-PIC has partnered with Clover Educational Consulting Group (Clover) to collect and maintain our evaluation data. Data collection is being conducted by Dr. Erin Foley and Dr. Christine Love Sterk at Clover, in partnership AK-PIC. If you have any questions or concerns regarding this evaluation survey, please email Dr. Foley and Dr. Love Sterk at accreditation.support@clovered.org.

What you will be asked to do: In this survey, you will be asked about your experience in supervision. Please provide as much detail as possible to help the Training Committee identify and understand potential areas of growth and improvement for you and future cohorts.

Confidentiality: Clover will collect, review, and analyze the responses to this survey. Responses will be shared with the Training Director(s) and supervisor. Please note that individual responses could be viewed by AK PIC staff.

Intern Name:

AK-PIC Site:

Which supervisor are you evaluating?

Supervision

Please use the following rating scale to evaluate your supervisor:

N/A	1	2	3	4	5
Not Observed/ Cannot Say	Significant Development Needed	Development Needed	Meets Expectations	Exceeds Expectations	Significantly Exceeds Expectations

Please rate the following general characteristics as they relate to your supervisor:

1. Is accessible for discussion, questions, etc.:
2. Allots sufficient time for supervision and schedules supervision meetings appropriately:
3. Keeps sufficiently informed of case(s):
4. Is interested in and committed to supervision:
5. Sets clear objectives and responsibilities:
6. Uses helpful educational techniques (e.g., role playing, audio or video recordings, didactics):
7. Is up-to-date in understanding of clinical populations and issues:
8. Presents as a positive role model:
9. Maintains appropriate interpersonal boundaries with patients and supervisees:

10. Provides constructive and timely feedback on supervisee's performance:
11. Encourages appropriate degree of independence:
12. Demonstrates concern for and interest in supervisee's progress, problems, and ideas:
13. Communicates effectively with supervisee:
14. Interacts respectfully with supervisee:
15. Maintains clear and reasonable expectations for supervisee:
16. Provides a level of case-based supervision appropriate to supervisee's training needs:
17. Assists with case management functions (e.g. managed care):
18. Is sensitive to ethical standards, legal considerations, and professional problems:
19. Overall satisfaction of supervision with primary supervisor:

Please rate how well your supervisor has contributed to the development of your clinical skills.

20. Assists in coherent conceptualization of clinical work:
21. Assists in translation of conceptualization into techniques and procedures:
22. Supports intern in navigating and responding to clients' cultural and individual differences:
23. Is effective in providing training in assessment, evaluation, and diagnosis:
24. Is effective in providing training in intervention:
25. Is effective in providing training in consultation:
26. Is effective in helping to develop short-term and long-range goals for patients:
27. Is effective in assisting supervisee in developing consultative relationships with other professionals and agencies:
28. Promotes clinical practices in accordance with ethical and legal standards:
29. Is effective in providing training in research:

Written Feedback

30. Describe how your supervisor has contributed to your learning.
31. Describe how supervision or the training experience could be enhanced.
32. Any other feedback/suggestions for your supervisor?

AK-PIC Program Evaluation Survey

General Information

Background Information: This Program Evaluation is used by the Alaska Psychology Internship Consortium (AK-PIC) to continually improve and enhance the training program. Your feedback is carefully considered. Any ratings of "Very Poor" or "Poor" on program-related items will result in action by the Training Committee to address the problematic item. Please include detailed explanatory comments wherever possible to help us respond most effectively.

Evaluators: AK-PIC has partnered with Clover Educational Consulting Group (Clover) to collect and maintain our evaluation data. Data collection is being conducted by Dr. Erin Foley and Dr. Christine Love Sterk at Clover, in partnership AK-PIC. If you have any questions or concerns regarding this evaluation survey, please email Dr. Foley and Dr. Love Sterk at accreditation.support@clovered.org.

What you will be asked to do: In this survey, you will be asked about your training experience with AK PIC. Please provide as much detail as possible to help the Training Committee identify and understand potential areas of growth and improvement for you and future cohorts.

Confidentiality: Clover will collect, review, and analyze the responses to this survey. Responses will be shared with the training faculty in aggregated form to help them understand interns' overall experiences with the training program. Please note that individual responses could be viewed by AK PIC staff.

Intern Name:

AK-PIC Site:

Please use the following rating scale when responding to this survey unless otherwise noted:

Very Poor	Poor	Satisfactory	Good	Very Good
1	2	3	4	5

Weekly/Regular Group Training Activities

Please rate the following components of weekly/regular group training activities.

1. Didactic Lectures

Overall quality of lectures:

Relevance of lecture topics:

2. Group Supervision

Overall quality:

Relevance/usefulness:

3. Please provide additional comments/feedback about the Friday group training activities.

Overall Quality of Training in Areas of Professional Functioning

For the following profession-wide competencies, please consider the training you have received through didactic seminars and professional development opportunities as well as experiential training.

1. Research:

Please provide additional information about your rating and/or training experience in this competency area.

2. Ethical and Legal Standards:

Please provide additional information about your rating and/or training experience in this competency area.

3. Individual and Cultural Diversity:

Please provide additional information about your rating and/or training experience in this competency area.

4. Professional Values, Attitudes, and Behaviors:

Please provide additional information about your rating and/or training experience in this competency area.

5. Communication and Interpersonal Skills:

Please provide additional information about your rating and/or training experience in this competency area.

6. Assessment:

Please provide additional information about your rating and/or training experience in this competency area.

7. Intervention:

Please provide additional information about your rating and/or training experience in this competency area.

8. Supervision (*This item refers to your training in the area of supervision and not to your experience as a supervisee):

Please provide additional information about your rating and/or training experience in this competency area.

9. Consultation and Interprofessional/Interdisciplinary Skills:

Please provide additional information about your rating and/or training experience in this competency area.

10. Please provide additional comments/feedback about your training in the profession-wide competencies.

For the following training areas, please consider the training you have received through didactic seminars and professional development opportunities as well as experiential training.

11. Distance Delivery of Services Training (**Note: Not all interns will necessarily provide clinical services via distance technology.):

Please provide additional information about your rating and/or training in this area.

12. Substance Use Disorder Training (**Note: All interns will have experience working with clients with drug and alcohol comorbidity (e.g., alcohol, marijuana, tobacco, opioids, misuse of prescription

medication and other illicit drugs). The clinical experiences within this major training emphasis will vary from site to site and may include but are not limited to: Screening Brief Intervention and Referral to Treatment (SBIRT), assessment, consultation, referral, outpatient treatment, inpatient treatment, and/or work within a court setting.):

Please provide additional information about your rating and/or training in this area.

Primary Training Site

Please rate the following for your primary training site:

1. Overall quality of training:
2. Breadth of clinical intervention experience:
3. Satisfaction with the number of client contacts:
4. Clarity of expectations and responsibilities for the intern:
5. Role of the intern at the site:
6. The caseload at my primary site was appropriate to meet my educational needs.
Yes
No
7. Please provide additional comments/feedback about your primary training site.

General Feedback (MID-YEAR EVALUATION ITEM)

Please rate these additional training experiences.

1. Orientation

Overall Quality:

Comments/recommendations for enhancement:

Final Thoughts about the Training Program

Please provide any other feedback and recommendations you believe might be helpful or might improve the internship.

Please provide any feedback you believe would help improve this program evaluation survey.

AK-PIC Didactic Evaluation

General Information

Background Information: The AK-PIC Didactic Evaluation is completed by interns after each didactic training. Data collected from the Didactic Evaluation survey is reviewed by the AK-PIC Training Committee and may be used to make programmatic enhancements for current and future cohorts.

Evaluators: AK-PIC has partnered with Clover Educational Consulting Group (Clover) to collect and maintain our evaluation data. Data collection is being conducted by Dr. Erin Foley and Dr. Christine Love Sterk at Clover, in partnership AK-PIC. If you have any questions or concerns regarding this evaluation survey, please email Dr. Foley and Dr. Love Sterk at accreditation.support@clovered.org.

What you will be asked to do: In this survey, you are asked to provide feedback on the weekly didactic training.

Confidentiality: Survey responses will be aggregated and sent to the Training Director(s) on a quarterly basis so that they may be reviewed by the Training Committee as part of the program's overall quality assurance process.

Intern Name:

AK-PIC Site:

Were you present for this week's didactic training?

Yes

No

Please enter the title of the didactic topic you are evaluating:

Please enter the name of the presenter for this didactic topic:

Please rate the following didactic components using this rating scale:

Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
1	2	3	4	5

Objectives

1. The learning objectives for this didactic session were identified.
2. The content was consistent with identified objectives.
3. The training approach supported the learning objectives.

Presenter

1. The presenter delivered the material in a clear and structured way.
2. The presenter was knowledgeable about the topic and related issues.
3. The presenter's style was engaging and held my interests.

4. The presenter demonstrated respect for and incorporated issues related to diversity.

Teaching Methods

1. Visual aids, handouts, and oral presentation clarified workshop content.
2. The teaching methods were appropriate for the subject matter.

Relevancy

1. The information could be applied to my practice.
2. The information could contribute to achieving my personal or professional goals.
3. This program enhanced my professional expertise.
4. The content was appropriate for the intended audience.

Please provide any additional comments you have regarding this didactic training.
